Welcome to Miele

IMMER BESSER (forever better) - our pledge

When our two great grandfathers founded the Miele company, they needed to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better than the rest. It is not possible to be both at the same time.

They decided to be "better" than the rest.

Numerous best in class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "immer besser" (forever better) throughout the past 116 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement.

At the heart of this success lies a continuity of values and goals which are typically only found in companies which have been family-run for generations, rather than in businesses which are guided by the often short-term interests of the stock market.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbors. Buying a Miele product is an environmentally friendly decision. We ensure this by using methods of production that save resources as well as producing products which set new standards in terms of their consumption of electricity, water and detergent – and save you money at the same time.*

As directors and co-proprietors of the fourth generation of our business we promise you that this will not change.

Markus Miele *Reinhard Zinkann*

"IMMER BESSER" (FOREVER BETTER)

Our Brand Promise

Many Good Reasons For Choosing Miele

Since the company was founded in 1899, Miele has remained true to its “immer besser” (forever better) brand promise. This means that we will do all that we can to be better than our competitors and better than we already are.

Miele Quality

Consumers have trusted Miele and relied on our appliances for more than 100 years. We are the only manufacturer in our industry to test products such as our washing machines, tumble dryers, dishwashers and ovens to the equivalent of 20 years' use. Miele consumers around the world remain loyal to Miele and recommend Miele to others. Looking to the future, we promise not to entertain any compromises when it comes to the dependability and durability of our appliances.

Miele Technology

Miele advocates top-class results combined with minimum energy consumption. This goes for the hygienic and gentle care of your laundry, your flooring and your dishware as well as when conjuring up exquisite culinary delights. The key to this is a wealth of innovative features available only from Miele. This is evident through numerous first places in leading product tests conducted around the world.

Miele Convenience

Whether using a conventional rotary dial, discreet sensor controls or a high-resolution touch display like the one on your smartphone: operating a Miele is both easy and fun. Add to this a multitude of convenient and reliable automatic programs and a great love of detail - success is guaranteed. Make life easier for yourself with Miele!

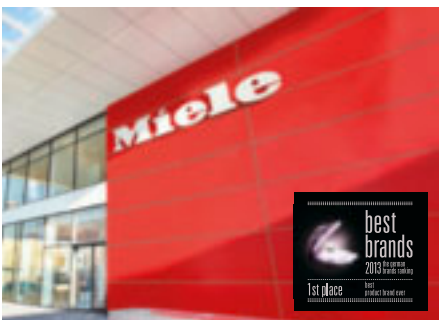

Miele Design

Miele believes in clean lines and timeless elegance. Nowhere else will you find such a comparable range of built-in kitchen appliances, with consistency in design lines and color options, to satisfy the most diverse of interior designs and kitchen furniture designs. Great care is taken to coordinate appliance design across the range. Whatever the style of your kitchen, Miele is the perfect match.

Miele Service

Miele customers enjoy preferential treatment. Thanks to our fast and efficient after-sales service operation, Miele has been voted "best in class" in its branch of industry many times over. Even if you need personalised instructions on appliance use or professional cleaning of your appliances, Miele will gladly make a home visit. We will always be there for you - that's a promise!

The Miele Brand

In many countries Miele is the most desired brand in its field. In its own home market in Germany, Miele was voted "best brand ever" across all product lines. The ownership of products from such a brand reveals much about its users. Miele customers have high expectations for the performance and environmental friendliness of their domestic appliances. People who buy Miele are quality conscious and have style!

What Makes Miele Vacuum Cleaners So Unique?

The Foundations Of Miele Vacuum Cleaners

Miele vacuum cleaners offer an ideal combination of superior cleaning performance, ease of use, outstanding hygiene standards and first-class quality.

Powerful Cleaning Performance:

This unique design allows you to achieve optimum results while on a low power setting.

Convenience

Miele has developed innovative technical features to make vacuuming easier for you.

Hygiene

Breathe easy with the multi-stage filtration system, ensuring only clean air is released while vacuuming.

Quality

Guaranteeing a longer lifespan, Miele vacuums undergo extensive quality testing during manufacturing.

Tested For The Equivalent Of 20 years' Use*

Miele Vacuum Cleaner Quality Tests

No daily cleaning routine will ever be as tough as a Miele product test. Before Miele vacuum cleaners go into production they must undergo extreme testing in our test laboratory.

Hose test

Miele suction hoses are twisted, flexed and stretched with an 11 lb. weight 120,000 times in the laboratory. You can pull your Miele vacuum cleaner along behind you without giving it a second thought.

Motor Endurance Test

We demand top performance from our vacuum cleaners from the first day to the last. Miele motors must demonstrate their quality during an intense endurance test which includes constantly switching them on and off.

Threshold Test

In real life, Miele vacuum cleaners are subjected to many knocks and obstacles. During the threshold test, they have to endure this strain 16,500 times without interruption.

Cable Rewind Test

Miele supply leads are unwound and rewound again more than 10,000 times in our test apparatus. Only then are we completely convinced that everything will work perfectly for you in your home.

Floorhead Test:

A Miele floorhead must master over 1,200 miles of cleaning various types of flooring surfaces- that is nearly as far as Seattle to Los Angeles. They also cross a carpeted door threshold 60,000 times.

The Handle Test

Miele vacuum cleaner handles are loaded with 11 lb. weights and then raised and lowered 120,000 times. The handle must withstand the permanent effect of being lifted without being damaged.

How Clean Does It Have To Be To Feel Good?

Miele Vacuum Cleaner Hygiene*

The Right FilterBag™

It is often difficult to find the right FilterBag™ for a vacuum cleaner. With Miele it's easy! You can recognize the right Original AirClean FilterBag™ by the color-coded collar on the bag.

First Class Suction Power

Miele's AirClean FilterBag™ remains sealed even as it fills, thanks to its multiple layers. The FilterBag™ change indicator informs you when the bag is full and should be replaced.

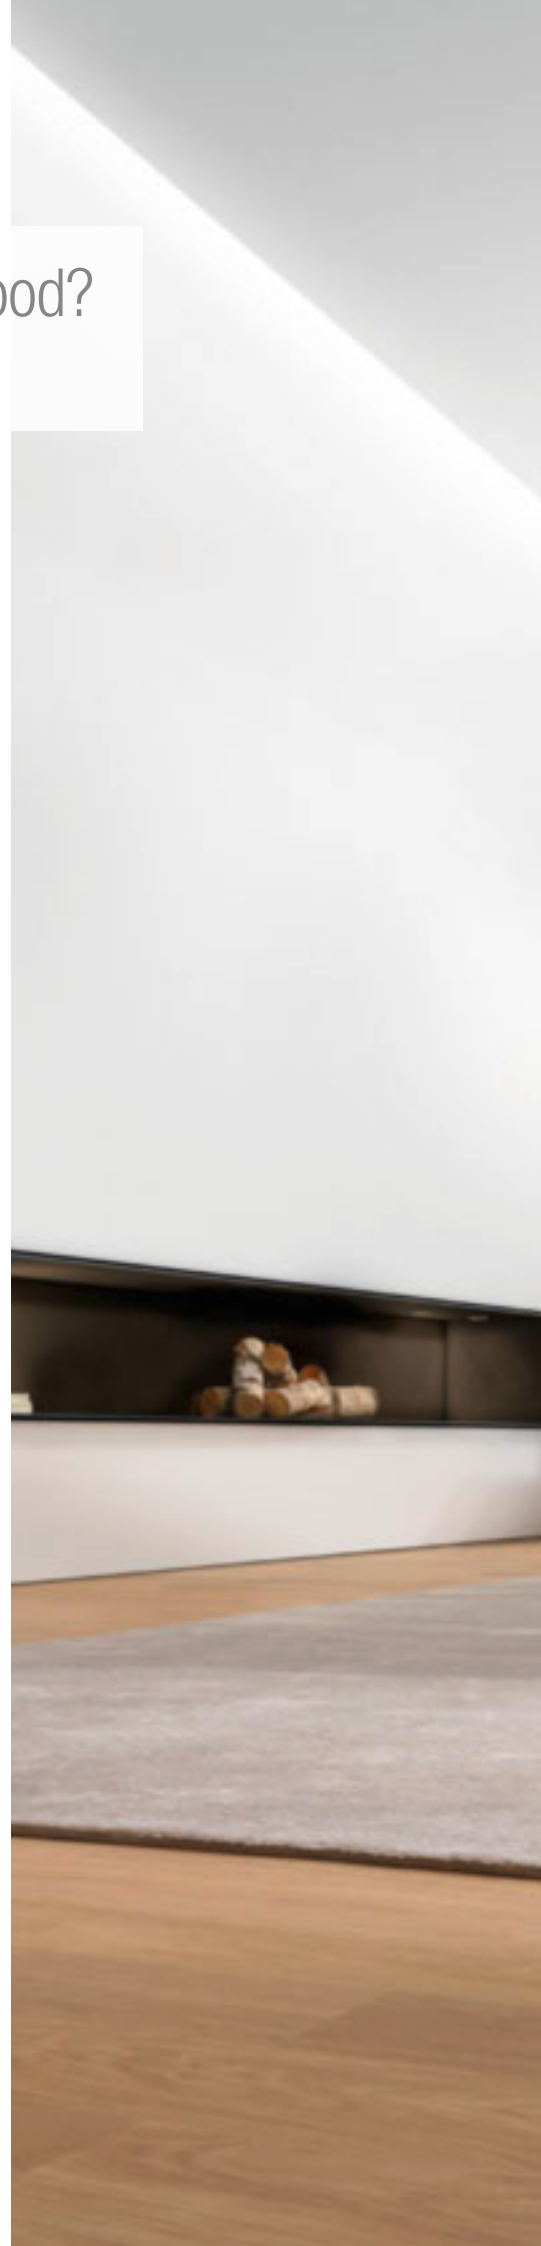

AirClean 3D Efficiency

The AirClean 3D FilterBags™ provide the highest level of efficiency, even when vacuuming at a low power level - due to the SoftStructure surface with little air resistance. As a result, you can save energy while vacuuming without compromising high cleaning performance.

Dust-Free FilterBag™ Replacement

When the vacuum cleaner is opened, the Original Miele FilterBag™ collar automatically closes and its contents are reliably locked inside. Additionally, the protective netting prevents the bag from tearing, even when sharp objects such as glass fragments are vacuumed up. Fine dust and lung-damaging particles cannot escape again.

Expert Workmanship

With Miele, you can choose from three different exhaust filters:

1. AirClean Filter:

Effective filtration for everyday needs. More than 99.9% dust retention capacity¹⁾ in combination with the FilterBag™ and motor filter.

2. Active AirClean Filter:

Significant reduction of unpleasant odors²⁾ – ideal for pet owners.

3. HEPA AirClean Filter:

Filters even the finest dust and allergens – ideal for those with house dust allergies. More than 99.999% overall dust retention capacity¹⁾, meeting the HEPA 13³⁾ standard.

Miele Vacuum Cleaners Are Airtight

Our vacuums meet the requirements of the TÜV Nord (environmental testing board in Germany), which are reviewed annually. TÜV Nord recommends Miele canister vacuum cleaners with HEPA AirClean filters for people suffering from allergies. Additionally, our AirClean Sealed System® seals the entire vacuum and not just the exhaust filter, reassuring that bacteria and allergens are not released back into the air. The filtered and discharged air is cleaner than the normal room air.

¹⁾ In accordance with EN 60312-1

²⁾ In accordance with DIN EN 13725

³⁾ In accordance with EN 1822/2011

The Perfect Vacuum For Your Home

Miele HomeCare Series

For those seeking a comprehensive cleaning package, Miele's HomeCare vacuums are the perfect solution. Equipped with additional accessories and your choice of optional floor tools, HomeCare can be customized for all types of homes. Available exclusively at Miele's independent retailers.

Universal Brush

Ideal for dusting around the home.

Flexible Crevice Tool

Makes reaching around furniture an easy task.

What Type Of Vacuum Would You Like?

Miele Vacuum Cleaner Designs

Miele offers vacuum cleaners in a variety of designs. Which model is the right one for you depends on the size of your home, type of flooring you have and your personal preferences.

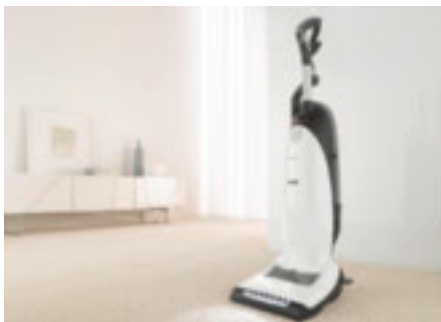

Canister Vacuum Cleaners

A canister vacuum cleaner has the classic sledge shape and follows you easily through the room thanks to its smooth-running wheels. The weight of the vacuum is almost entirely on the floor, making it comfortable to pull when cleaning large areas.

Stick Vacuum Cleaners

Due to their compact design and flexible configurations, these vacuums are ideal for tightly furnished or small spaces. Can be converted to a hand-vacuum to suit your cleaning needs. Miele stick vacuum cleaners are easy to carry and need little storage space.

Upright Vacuum Cleaners

Miele's Dynamic U1 upright vacuum cleaner is the specialist for hard-wearing carpets with a lot of traffic. It can also be used on hard floors because the roller brush can be easily turned off. SwivelNeck™ technology, along with a flat-to-the-floor design, allow for unmatched maneuverability.

Robot Vacuum Cleaner

Miele's battery operated robot vacuum cleaner works completely independently—even when nobody is at home. Equipped with a ceiling camera and sensors for maximum floor coverage, the Scout RX1 recognizes all obstacles in a room. Thanks to Smart Navigation it cleans thoroughly and efficiently, even among lots of furniture.

Which Preferences Do You Have For Your Canister?

Miele Canister Vacuum Cleaners

Miele canister vacuum cleaners differ in both size and features. They all have one thing in common- long-lasting Miele quality!

Complete C3 – Powerful & Exceptional

- About 16 lbs. with accessories
- Up to 36 ft. operating radius
- Over 1 gallon dustbag volume
- 1,200 W maximum wattage
- +/- footswitch or handle controls
- Models with electrobrush
- Integrated accessories

Compact C2 – Light & Convenient

- About 14 lbs. with accessories
- Up to 33 ft. operating radius
- About 1 gallon dustbag capacity
- 1,200 W maximum wattage
- Rotary dial power switch
- Accessories on VarioClip

Classic C1 – Light & Functional

- About 13 lbs. with accessories
- Up to 29 ft. operating radius
- Over 1 gallon dustbag capacity
- 1,200 W maximum output
- Rotary dial power switch
- Accessories on VarioClip

Convenient Operation For Best Vacuuming Results

The Controls* On Miele Canister Vacuum Cleaners

Always adjust the suction power to accommodate the surface in which you are vacuuming. Miele vacuums have several convenient settings available for all vacuum types.

6-Stage Rotary Dial

The electronic power control is operated by a six-stage rotary dial. Symbols for a variety of applications make it easy to select the optimum power level.

Plus/Minus Foot Controls

These ergonomic controls make operating your vacuum much more convenient. Symbols facilitate selection of the optimum power level for each area of use.

Electronic Handle Controls

This model has a power indicator integrated into the handle and a separate switch in order to turn the electrobrush on and off.

Which Product Features Are Important To You?

The Product Highlights* Of Miele Canister Vacuum Cleaners

Comfort Handle

With the flexible hose connector, the floor tool can be maneuvered with ease.

Practical locking system

Nothing comes loose: Floorhead, suction tube and handle lock into each other with an audible fit.

Silence System

Our Silence-System with noise optimized motor and integrated sound insulation provide for a quiet vacuuming experience.

Comfort Cable Rewind With Single-Touch Control

The entire cable can be rewound by simply tapping the footswitch.

Compact System

Floorhead and suction tube can be parked on either side of the vacuum cleaner, saving a lot of space.

DynamicDrive Swivel Wheels¹⁾

Rubberized swivel wheels with shock absorbers ensure a quiet driving experience and protect your floors in the process.

* Features depend on model

Which Product Features Are Important To You?

The Product Advantages* Of Miele Canister Vacuum Cleaners

Complete Range Of Accessories

Canister vacuums come standard with an upholstery tool, crevice nozzle and a dusting brush integrated or on VarioClip.

EasyLock Suction Wand

The suction tube is easy to attach, transport and store.

Double Parking System For Storage

Suction tube and hose can be securely attached to the vacuum while upright, allowing for easy transportation.

Innovative Finishes

Miele has been offering innovative coatings and finishes for many years.

Anti-Static Handles

A metal insert in the handle prevents static discharge between the vacuum and user for your safety.

Large Operating Radius

Miele canister vacuum cleaners provide an operating radius of up to 36 feet so you don't have to change outlets often.

Comfort Handle With SpotLight¹⁾

The high-performance LED light illuminates dark areas while cleaning.

Illuminated Park System²⁾

The LED lights will remain lit for 30 seconds after turning off the vacuum, to assist with easy storage in dark areas.

Velvet Bumper Strip

A protective strip of velvet material surrounding the vacuum makes for gliding effortlessly past furniture.

Stainless Steel Telescopic Wand

Height-adjustable telescopic wands adjust easily to your working height.

Park System

Floorhead and suction wand are parked at the rear. Depending on the model, the motor switches off automatically.

Locking System

Floor head, suction tube and handle lock into each other securely.

Furniture Protection Strip

Soft plastic strip protects your furniture and the vacuum against accidental collisions and scratches.

Gentle-Start Motor

When Miele vacuum cleaners are switched on, power increases gently and gradually to the selected power level.

Thermal Protection

An automatic temperature limiter protects the motors of Miele's canister vacuum cleaners from overheating.

Chrome Trim

The foot switches, hose connector and vent grill are chrome-plated for a more refined finish.

Glossary For Miele Canister Vacuum Cleaners

A Complete Range Of Accessories

Miele canister vacuum cleaners are equipped with three high-quality, standard attachments: Upholstery nozzle, crevice nozzle and dusting brush with soft synthetic or natural bristles. They are integrated or on a VarioClip.

Chrome Trim

Apart from the foot switches, the suction hose connector and the vent grill also have a high-grade chrome finish. The chrome surface adds a touch of class to the design of the Complete C3.

Cleaning Performance

High wattage alone does not guarantee a good vacuum cleaner. With Miele, a number of design characteristics interact in a most efficient manner. The vacuum cleaner's tight seal and perfect air flow ensure strong suction at the floorhead. For low-wattage vacuum cleaners Miele has developed particularly efficient floorheads which achieve best cleaning results even with a low power level setting.

Comfort Handle

The flexible hose connector enables comfortable, ergonomic handling. The lever allows the floorhead to be maneuvered more easily and takes pressure off your wrist.

Comfort Handle With SpotLight¹⁾

With an integrated power LED light, it illuminates the area ahead of the floorhead which helps vacuuming in dark corners. After pressing the light button gently, the SpotLight illuminates and stays on for 30 seconds, then softly fades automatically.

Comfort Cable Rewind With Single-Touch Control

The cable on all Miele canister vacuum cleaners can be rewound easily with a foot control. Compact C2 and Complete C3 vacuum cleaners are also equipped with a single-touch control function enabling the entire cable to be rewound at the touch of a button.

Compact System

Thanks to the sophisticated Compact System consisting of a Park System on both sides and an easy-to-store XXL handle, Miele canister vacuum cleaners are particularly space-saving.

DynamicDrive Swivel Wheels²⁾

The unique DynamicDrive swivel wheels rotate 360°, are mounted on steel axles and are equipped with shock absorbers. The rubberized wheels move smoothly, are scuff-proof and long-lasting.

EasyLock Suction Wand

The EasyLock suction wand with a unique socket system is easy to attach, transport and store.

Fascinating Surfaces

Many years ago, Miele was the first manufacturer to introduce canister vacuum cleaners with metallic coatings – and has since created many innovative surfaces. Look out for our PearlFinish vacuum cleaners!

EasyLock Suction Wand

The EasyLock suction wand with a unique socket system is easy to attach, transport and store.

Fascinating Surfaces

Many years ago, Miele was the first manufacturer to introduce canister vacuum cleaners with metallic coatings – and has since created many innovative surfaces. Look out for our PearlFinish vacuum cleaners!

Furniture Protection Strip

The Miele Complete C3 vacuum cleaner is equipped with an all-round bumper made from soft synthetic material. This protects both your furniture and the vacuum in the event of accidental collisions.

Gentle-Start Motor

When Miele vacuum cleaners are switched on, power increases gently and gradually to the selected power level. This protects the circuit from overloading.

Handles With Anti-Static Conductor

All Miele canister vacuum cleaners have a small metal strip integrated into the handle, which prevents static discharge between the vacuum and user.

Locking System

Floorhead, suction tube and handle lock into each other with an audible fit. The parts all connect securely but can be easily disengaged at the touch of a button, making it simple to attach different accessories.

Hygiene

Miele vacuum cleaners' exceptional overall filtration is based on a multi-stage system. It consists of the innovative Miele AirClean dustbag, motor protection filter and Miele exhaust filter. The interaction of these components ensures that more than 99.9% of fine dust³⁾ is filtered. You can breathe with ease!

Illuminated Park System⁴⁾

The park system on either side of the Complete C3 Brilliant is equipped with maintenance-free LEDs. They make it easier to insert the floorhead into the Park System – even in dark areas. They also create an elegant blanket of light while vacuuming and stay illuminated for 30 seconds after switching off.

Operating Radius

Lead, suction tube and suction hose provide a particularly large operating radius. This is useful for cleaning big rooms without having to change sockets so often.

Park System

The floor head is simply hooked onto the rear of the vacuum cleaner, leaving the suction wand in a secure position ready for use again. The Complete C3 Brilliant motor is switched off automatically in this instance.

Double Park System

Suction wand and hose can be securely attached to either side of the vacuum while upright. This allows the vacuum cleaner to be transported easily, stored with minimum space requirements, and operated comfortably by left-handed and right-handed users alike.

Quality

Quality is Miele's highest priority, from start to finish for all of our vacuum cleaners. Miele vacuum cleaners are developed and manufactured exclusively in company-owned plants. At the end of the manufacturing process, each individual vacuum cleaner is subject to comprehensive testing. This care and attention results in exceptional quality and a long service life for Miele products.

Silence System / Silence System Plus

Reduced-noise motor and integrated sound insulation make Miele vacuum cleaners pleasantly quiet. The silence setting achieves the lowest possible noise level with good cleaning performance. Silence System Plus: especially quiet due to a soundproofed motor and sound-optimized floor head.

Stainless Steel Telescopic Wands

Telescopic wands by Miele can be adjusted to your working height at the touch of a button, so that you can vacuum comfortably. The cable in electro-telescopic wands is encapsulated and invisibly integrated to ensure safe use of the electrobrush.

Thermal Protection

A temperature limiter protects all Miele canister vacuum cleaners from overheating. Should the air passage become blocked – for instance by vacuuming up bulky particles – the motor will automatically shut off for safety. After the cause of the shut-off has been eliminated and the vacuum has cooled down, it is ready again for service.

User Convenience

Miele has developed many clever technical features to make floor care as easy as possible for you. For instance, the convenient handle controls that enable you to regulate suction power at the touch of a finger.

Velvet Furniture Bumper Strip

The all-round bumper strip on the Complete C3 Brilliant is made of velvet material allowing the vacuum to glide alongside obstacles with particular ease. It protects furniture and the vacuum in the event of accidental collisions.

Which Product Features Are Important To You?

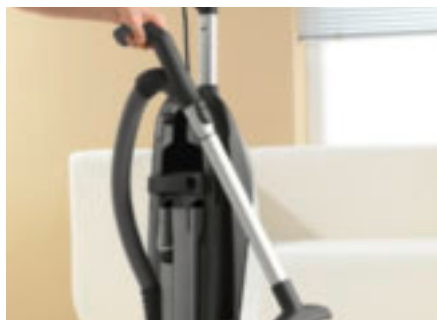

Product Highlights* Of Miele Upright Vacuum Cleaners

Extra Powerful

Not many floor coverings create a feeling of comfort like carpeted floors. Miele has developed the Dynamic U1 to ensure proper care for all carpeting throughout your home. It has the special feature of an integrated roller brush which cleans carpet fibers thoroughly and carefully restores the pile.

SwivelNeck²⁾

The double-swivel joint makes the Dynamic U1 both nimble and versatile. Maneuvering around furniture is made easy.

Automatic Height Adjustment¹⁾

The electrobrush automatically adjusts to the carpet pile.

Large Operating Radius

Miele upright vacuum cleaners provide an operating radius of up to 54 feet so that you may not need to change outlets as much while vacuuming.

Flat-To-Floor Design

The slender body makes it possible to vacuum under and around beds and tables easily.

Large AirClean FilterBag™

The FilterBag™ has a volume of about 1.5 gallons, thus eliminating constant bag replacement. A self-locking AutoSeal™ collar ensures that particulates are never released back into the air once captured inside of the bag.

Range Of Accessories

Miele Upright vacuum cleaners are equipped with an integrated upholstery nozzle, crevice nozzle and dusting brush.

Which Product Features Are Important To You?

The Product Advantages* Of Miele Upright Vacuum Cleaners

Silence System

Whisper quiet thanks to Miele's Silence setting, a noise-optimized motor and integrated sound insulation.

Integrated LED Lighting

Maintenance-free LED headlight in the floorhead perfectly illuminates the area ahead to be vacuumed.

Aluminium Telescopic Wand

Light-weight, height-adjustable telescopic wand.

Comfort Handle

The Dynamic U1 and electrobrush can be switched on and off via integrated controls in the handle.

Ergonomic Carrying Handle

The Dynamic U1 is easy to carry with the ergonomically-shaped carrying handle.

Quick-Release Cable Hook

The vacuum cleaner's cable is neatly held in place with a cable hook, which is easy to release when needed.

"Power Plus" Electrobrush

A rotating brush ensures thorough and intensive cleaning of heavy-duty carpets.

Park Position

Thanks to its large footprint, the Dynamic U1 can be parked safely without tipping.

Versatile Floor Unit

The Dynamic U1 electrobrush cleans thoroughly right up to the edges, while also featuring a wide range of functions.

Gentle-Start Motor

When Miele vacuum cleaners are switched on, power increases gently and gradually to the selected power level.

Rotary Dial

The desired power level can be selected easily with the Rotary Dial.

Plus/Minus Buttons

Symbols help you choose the optimum power level at the touch of a finger.

Automatic Setting

Suction power is automatically adjusted to suit the floor type being vacuumed.

Useful Information

Miele Upright Vacuum Cleaner Glossary

Complete Range Of Accessories

Three standard premium accessories are integrated at the rear of Miele upright vacuum cleaners: Upholstery nozzle, Dusting brush and Crevice tool.

Aluminium Telescopic Wand

The high-quality Telescopic Wand can be adjusted to your working height at the touch of a button making hard to reach areas easily accessible. It is also ideal for using with accessories.

Automatic Setting

Miele vacuum cleaners with the Automatic Setting automatically adjust their suction power to the floor type being vacuumed. This helps you to achieve the best cleaning results using the least amount of energy.

Automatic Height Adjustment¹⁾

The beater bar of the integrated "Power Plus" Electrobrush is spring-mounted which allows it to adjust automatically to the carpet pile height.

Carrying Handle

The Dynamic U1 has an ergonomic carrying handle on the back for safe, convenient transport. It is positioned so that the upright vacuum cleaner can be lifted and transported easily. This makes the Dynamic U1 easy to carry – especially when it has to be carried upstairs.

Comfort Handle With Integrated Controls

The Comfort Handle with SoftGrip insert is pleasant to hold and allows easy navigation of the Dynamic U1. You can switch the vacuum on or off at the touch of a button and switch the electrobrush on and off as needed.

SwivelNeck²⁾

The Dynamic U1 is equipped with a unique double swivel joint. This makes it surprisingly maneuverable and able to pass with ease over and around obstacles.

"Power Plus" Electrobrush

Powered by its own motor, the Electrobrush rotates at a steady speed and applies uniform pressure – regardless of which suction power is selected. The rotating action ensures intense and deep cleaning of hard-wearing carpets. The electrobrush can be switched off, making it suitable for the cleaning of smooth floors.

Flat-To-The-Floor Design

The SwivelNeck and slender body of the Dynamic U1 make it possible to vacuum under beds and tables easily.

Safety Shut-Off

The Dynamic U1 has a Safety Shut-Off if anything is vacuumed by mistake.

Gentle-Start Motor

When the Dynamic U1 is switched on, power increases gently and gradually to the selected power level which also protects the circuit from overloading.

AirClean FilterBag™

The Dynamic U1 FilterBag™ has a volume of 1.5 gallons – you can vacuum for a long time without having to replace the bag. The AirClean FilterBag™, in combination with the motor protection filter and exhaust filter, ensure that more than 99.9% of fine dust is filtered from the air.

Integrated LED Lighting

Maintenance-free LED strip in the floorhead lights up the darkest corners, leaving no dirt undetected.

Operating Radius

The Dynamic U1 features a 54 foot cleaning radius including the cable, telescopic wand and flexible hose. There is no need to change electrical outlets as often while cleaning.

Park Position

Thanks to its large footprint, the Dynamic U1 can be parked without tipping over during breaks in vacuuming. The roller brush is switched off automatically when in park.

Plus/Minus Buttons

Suction power is electronically regulated at the touch of plus/minus buttons. Graphic symbols for different floor types help you select the most suitable power setting.

Quick-Release Power Cord

Two convenient hooks, as well as a securing clip, keep the power cord secure and always at hand. When vacuuming starts, the cord can be released quickly by turning the lower hook upwards.

Rotary Dial

The suction power is controlled by an adjustable rotary dial. Text descriptions for different settings help to select the optimum power setting for each cleaning surface.

Silence System

A low-noise motor along with integrated sound insulation make the Dynamic U1 pleasantly quiet while in use. The Silence Setting achieves the lowest possible noise level without compromising cleaning performance.

Protective Bumper Strip

The soft bumper strip protects your furniture in case of accidental collisions while vacuuming.

Useful Information

Glossary For Miele Swing H1 Universal Upright

Accessory Clip

The Upholstery and Crevice Tools can be clipped into place on the suction wand for easy access at all times.

Easy-To-Store

The compact and light-weight Miele Swing H1 vacuum cleaner can be stored conveniently in small closets and spaces. With an integrated non-slip stopper, the vacuum can rest securely against a wall or can be hung up with the sturdy holder that is located on the handle.

Sliding Power Switch

Easy to operate the power settings of the vacuum cleaner using a sliding power switch.

Gentle-Start Motor

When Miele vacuum cleaners are switched on, power increases gently and gradually to the selected power level protecting the circuit from overloading.

Easy To Maneuver

The Miele Swing H1 vacuum cleaner has a slim, light-weight body that can glide easily through a small home with a lot of furniture.

Versatile Handle

Featuring an integrated non-slip stopper so the vacuum can be leaned securely against walls or doors. Can also be hung with a hook on the handle.

Operating Radius

The Swing H1 allows for a 28 ft. operating radius so that there is no need to change electrical outlets as often.

Quick-Release Power Cord

The power cord is neatly held in place by two cord hooks and a power cord clip. When you start vacuuming, the cord can be released quickly by turning the lower hook upwards.

Stainless Steel Telescopic Wand

The length of Miele's telescopic wand can be easily adjusted to suit your working height at the push of a button. This is not only gentle on your back, but ideal for vacuuming underneath furniture as well.

Heat Protection

A temperature limiter protects the Swing H1 from overheating. Should the air passage become blocked – for instance by vacuuming up large particles – the motor will automatically shut off for safety's sake. After the cause of the shut-off has been eliminated and the vacuum has cooled down, it is ready to be used once again.

Robot Vacuum Cleaner

Navigation Comparison	60
Product Highlights	62
Product Advantages	64
Product Overview	66
Glossary	67

Why Can Miele Robot Vacuums Do More?

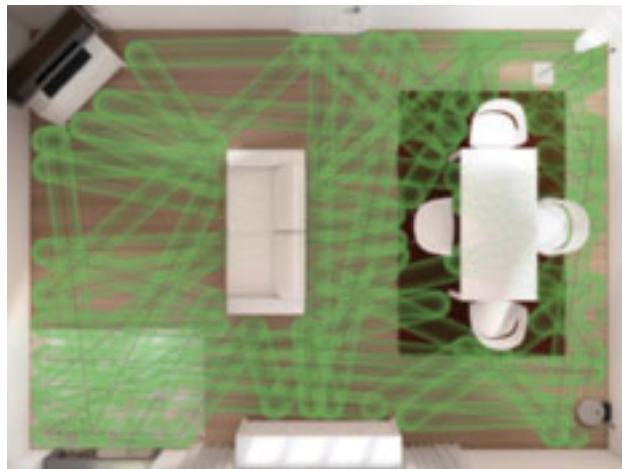

Comparison Of Different Navigation Systems

A dependable navigation system is essential for robotic vacuum cleaners in order to clean floors reliably without missing any spots. With Smart Navigation, Miele has achieved a significant advantage in terms of quality and performance. With the unique combination of a ceiling camera, gyro sensors, electronics and software, the Scout RX1 navigates more efficiently than any other robotic vacuum cleaner.

Chaotic Navigation

Basic robotic vacuum cleaners do not feature a ceiling camera and are unable to recognize the layout of the room; they essentially move "blindly" about a room. This non-systematic approach uses up a lot of electricity and results in an inconsistent cleaning job.

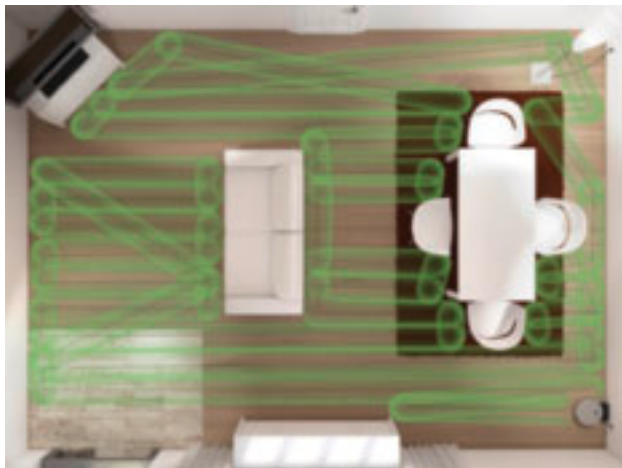

Unreliable Performance: Only the green areas were cleaned by the robot vacuum, with significant gaps in between.

Systematic Navigation

Slightly improved robot vacuums contain gyro-sensors and a ceiling camera, ensuring a more parallel cleaning path. This does not guarantee, however, the cleaning of difficult to access areas and edges.

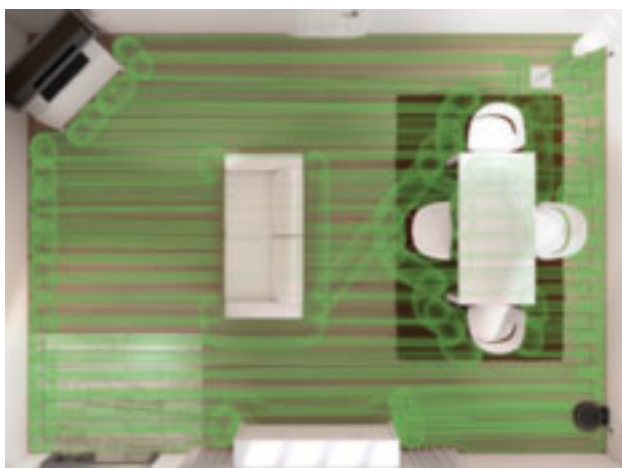

Improved Performance: The parallel green paths signify a more regulated cleaning system, but it still leaves several areas uncleaned.

Smart Navigation Featuring Miele

The ceiling camera, gyro sensors and innovative software make up for an entire indoor positioning system providing maximum coverage. Even difficult-to-reach areas and edges are reliably cleaned.

Best performance: The Scout RX1 Red is visibly superior in offering better navigation performance and producing the most efficient cleaning path without any gaps.

Which Product Features Are Important To You?

Product Highlights Of The Miele Scout RX1 Red Robot Vacuum

Smart Navigation

With the Scout's reliable navigation system, rooms are thoroughly cleaned edge to edge- even in difficult corners.

Furniture Protection Technology

The Scout RX1 recognizes furniture, stairs and obstacles in order to avoid collisions or falls.

Advanced Corner Cleaning

The Scout assuredly finds every corner and edge, removing all dust and dirt.

Triple Cleaning System

Thanks to the Triple Cleaning System the Scout RX1 sweeps, brushes and vacuums removing all dust and dirt in its path.

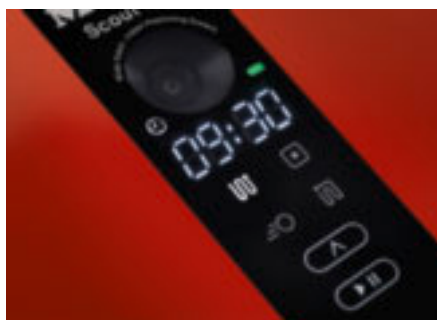

Non-Stop Power

The rechargeable battery of the Scout RX1 lasts for up to two hours (1,600 sq. ft.) without a break. It also lasts three times longer than other batteries.

Timer

The Scout RX1 cleans your home whenever you want - even when no one is at home. Simply set the timer for when you would like the Scout to clean your home.

Which Product Features Are Important To You?

Product Advantages Of The Miele Scout RX1 Red Robot Vacuum

Auto Mode

In Auto mode, the Scout RX1 automatically accesses all required areas with a break for charging if necessary.

Spot Mode

A specific 6 sq. ft. area can be cleaned thoroughly using Spot Mode.

Corner Mode

The Scout RX1 first completes a round of Auto Mode then cleans the critical edge areas one more time in Corner Mode.

Turbo Mode

In Turbo-Mode the Scout RX1 performs an "express cleaning", removing dust, dirt and pet hair from all areas in only half the time.

AirClean Filter

With the two-stage AirClean filter, the room air is cleaner after vacuuming than it was before.

Remote Control

You can use the Remote Control to conveniently direct the Scout RX1 to a specific area.

Touch User Interface

The Scout RX1 starts up after only two touches on the display or Remote Control.

Flat-To-Floor Design

The compact, flat Scout RX1 can easily reach difficult-to-access areas such as under furniture.

From Floor To Carpet

The Scout RX1 effortlessly crosses door thresholds and can drive onto carpets with a 1 in. clearance.

Useful Information

Glossary For The Miele Scout RX1 Red Robot Vacuum

Advanced Corner Cleaning

Dust and dirt tend to settle into the corners of a room, and it is in these areas that many robotic vacuum cleaners do not perform well. With the Scout RX1's dependable Navigation System, it finds its way to remote corners and edges- where its extra long side brushes capture all the dirt.

AirClean Filter

The AirClean Filter ensures that the vacuumed dust remains where it belongs in the Scout RX1's dust bin. The two stage AirClean system filters dust particles from the air particularly thoroughly while vacuuming.

Auto Mode

In Auto Mode, the Scout RX1 cleans all accessible rooms completely on its own. It leaves its charging station, cleans the desired floor areas and returns to its charging station once finished. If the battery charge is not sufficient for all areas, the Scout RX1 interrupts the cleaning process in order to charge its batteries at its charging station. After approx. 120 minutes, it resumes the cleaning process by returning to the exact location where it previously stopped cleaning.

Corner Mode

The most dust collects in corners and edges where there is the least air movement. Luckily, the Scout RX1 has its own Corner Mode in which it cleans all areas in Auto Mode then revisits the corners and edges of a room a second time.

Flat Design

With its compact, slim body the Scout RX1 moves through your home with dexterity. It even goes under low furniture and other difficult-to-reach areas with ease.

Furniture Protection Technology

Seven optical sensors at the front of the Scout RX1 recognize furniture and other obstacles in its path at all times. The Scout RX1 approaches these objects cautiously in order to clean the floor directly in front of them. An additional 3 sensors underneath the vacuum prevent the Scout RX1 from falling down stairs.

Non-Stop Power

Thanks to a powerful lithium-ion rechargeable battery, the Scout RX1 operates up to 120 minutes with a single battery charge. In this time it can clean up to approx. 1615 sq. ft.. Even after 300 full charging cycles, the battery still generates the same amount of power as it did when it was new.

Remote Control

With the Remote Control, you can operate the Scout RX1 yourself. With simple commands, the vacuum cleaner can be guided directly to certain areas.

Smart Navigation

Smart Navigation combines three innovative features: a Ceiling Camera ensuring reliable navigation, Furniture Protection Technology and advanced Corner Cleaning.

Spot Mode

Crumbs under the breakfast table? Dog hair in front of the sofa? The Scout RX1 takes care of these little mishaps for you. Simply activate Spot Mode and the Scout RX1 cleans a targeted area of 6 sq. ft.

Timer

You can program the floor cleaning times individually. For instance, you can schedule the vacuum to clean when you are not even at home. The vacuum returns to its charging station on its own to recharge the battery.

Touch User Interface

Operating the Miele robot vacuum cleaner is so easy. You can select your desired cleaning program with only two touches on the clearly laid out touch display. Alternatively, you can use the Remote Control supplied as standard.

From Floor To Carpet

Thanks to its powerful motor and its non-slip wheels, the Scout RX1 masters the transition from smooth floors to carpet without any problem. Even crossing over thresholds does not pose a problem. You can be sure that the Miele robot vacuum cleaner will follow its route steadily- to effectively clean your home.

Triple Cleaning System

The Scout RX1 tackles dirt and dust in three ways. The two rotating Side brushes pull the dirt from corners and edges under the vacuum cleaner. The roller brush picks up the larger particles of dirt and dust, while the powerful DC motor sucks up the fine dust.

Turbo Mode

For quick cleaning in between sessions, the Scout RX1 offers Turbo Mode. The Scout RX1 moves in its systematic lines, but further apart to save time. Turbo Mode completes in half the time it takes to complete a round of Auto Mode.

Scout RX1 Red Robotic Vacuum Accessories

For Easy Vacuuming

Maintain Cleaning Performance With Original Miele Accessories

Regular replacement of filters and brushes ensures continuous suction and cleaning performance of your Miele robotic vacuum. Changing accessories on your Scout RX1 is both quick and easy.

**Magnetic Strip
RX-MB 4**

Defines areas that you would not like to be vacuumed. Can be placed temporarily or permanently, to block off rooms or flooring. The Scout RX1 comes equipped with 4, three foot magnetic/adhesive strips.

**4 AirClean Filters
RX-SAC 1**

Securely traps in dust and ensures clean room air. Protects the motor as it filters all dust and allergens, to guarantee top cleaning performance. Each pack contains 4 AirClean Filters.

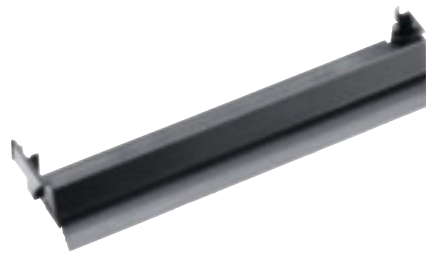

Magnetic Strip

The magnetic strip is a practical aid that can be used to section off particular areas you may not want vacuumed in your home.

**Side Brushes
RX-SB 2**

For thorough cleaning of edges and corners, the Scout's Side brushes have hard-wearing synthetic bristles. Best results are obtained on smooth floors and short-pile carpeting. The Scout RX1 comes packaged with 2 brushes, for the left and right hand side.

**Sealing Lip
RX-DL 1**

For effective and reliable dust pick-up, the Sealing lip prevents dust from passing underneath the unit. Scout RX1 comes standard with one Sealing lip.

**Chevron Style Brush Roll
RX-BW 1**

With high-quality, hard-wearing synthetic bristles, the Chevron style brush roll rotates to remove stubborn dirt and dust from your flooring. The Scout RX1 comes standard with one brush roll.

For Perfect And Convenient Dust Pick-Up

Original Miele Vacuum Cleaner Accessories

Perfect Dust Pick-Up

Because every home is furnished differently and living situations vary considerably, Miele offers a wide range of vacuum cleaner accessories. This enables you to adapt your Miele vacuum cleaner to suit your personal needs. For example, Miele offers an array of suitable floorheads and brushes for your floors along with special accessories for different types of surfaces. Even difficult-to-access areas can be accessed quickly without any stooping or climbing.

Miele Seals All Dust Securely In The FilterBag™

The Miele AirClean System, consisting of the original Miele FilterBag™, the motor protection filter and the exhaust filter, ensures maximum hygiene. Using original Miele accessories with Miele vacuum cleaners significantly reduces the amount of fine dust in the room air. The interaction of all components guarantees filtration of more than 99.9% of fine dust¹⁾. The room air is cleaner after vacuuming than it was before!

Quality And Safety

Miele accessories must withstand the highest degree of strain and endurance testing. Just like our vacuum cleaners, our accessories are also tested for the equivalent of 20 years' use²⁾.

Gentle Cleaning

Using genuine original Miele accessories ensures that your floors, furniture and other surfaces are cleaned gently, yet extremely thoroughly.

1) In accordance with EN 60312-1

2) Corresponds to an average of 45 minutes vacuuming per week using maximum power.

cordless
stick

CLP

Combination Floor Tools

For Carpets And Hard Floors

Miele Combination Floor Tools

Miele's combination floor tools are a practical solution for homes with small spaces and different types of floor coverings. Foot switches for operating the bristle strip are located on the floor tool and depending on the floor covering, you can choose to vacuum with or without it. Miele combination floor tools are suitable for cleaning carpets as well as hard floors. Thanks to the metal baseplate and rubberized wheels, they glide softly across the floor. For rooms with large areas of carpet or hard flooring, we recommend our floor brushes that are specifically developed for certain floor types.

**AirTeQ Combination Tool
SBD 650-3**

An energy-saving floor tool for particularly quiet vacuuming. Operates using an optimized air stream, using up to 40% less energy consumption. Features a metal soleplate for easy gliding over hard floors and carpets, along with a soft furniture protection strip.

**AllTeQ Combination Tool
SBD 285-3**

Ideal for low-pile carpeting and hard floors. Extendable and retractable bristle strip for use as needed. Double swivel joint and wide metal soleplate make for smooth gliding across surfaces. Rubberized wheels prevent scratches on hard floors, while a thread catcher on the underside removes thread and hair.

**FiberTeQ Combination Tool
SBD 470-3**

Ideal for vacuuming along low-pile carpets and hard floors. Wide metal soleplate makes for easy gliding, while rubberized wheels protect scratch-sensitive hard floors. Includes an extendable and retractable bristle strip to use as needed.

Parquet Floor Brushes

For Scratch-Sensitive And Hard-Wearing Floors

Smooth-Running, Agile Miele Parquet Floor Brushes

Many hard floor types such as hard wood, laminate and tile are very susceptible to scratches. Miele parquet brushes have been developed to preserve the beautiful appearance of your sensitive floors to keep them looking like new. With their soft all-round bristle strip, Miele parquet floor brushes clean your hard floors quickly and thoroughly. Twister parquet floor brushes feature a unique double swivel joint, in order to easily twist and turn the floor brush.

**Parquet Twister XL
SBB 400-3**

At 16" wide, large areas of flooring can be vacuumed in a shorter amount of time. Includes a flexible double-swivel joint along with soft, natural bristles that glide smoothly over floors.

**Parquet Twister
SBB 300-3**

Twelve inches wide, featuring a unique double swivel joint which rotates 180 degrees. Vacuuming is quick and exceptionally agile when cleaning around obstacles or furniture. Its soft, natural bristles make for easy gliding along smooth surfaces.

**Parquet Floor Brush
SBB Parquet-3**

With a wide suction inlet and natural bristles, the Parquet floor brush provides a gentle and effortless cleaning. Two rubberized wheels protect your flooring while vacuuming.

Miele Hard Floor Brushes

Their high-quality and hard-wearing bristles sweep even the finest dust out of deep gaps and crevices - ideal for the thorough cleaning of tiles and other structured hard floor surfaces.

**Hard Floor Brush
SBB 235-3**

Featuring high-quality synthetic bristles with a wide suction inlet, for thorough cleaning of hard-wearing floors. Specializes in removing the smallest particles from the gaps and grooves of your hard-wood floors. Two rubberized wheels allow for gently gliding along your flooring.

* Recommended retail prices in euro incl. VAT.

Turbobrushes

For Short-Pile Floor Coverings

Miele Turbobrushes

Carpets should be vacuumed regularly, even when no dirt is visible to the eye. To ensure that dust, dirt and hair are removed reliably from deep in the carpet, the carpet must be brushed at the same time it is being vacuumed. The beater bar on Miele's Turbobrush, powered by the passage of air through the suction tube, ensures thorough removal of everything that collects inside your short-pile carpet. Regular vacuuming will raise the loops and fibers in your carpet to keep it looking new and beautiful for longer! Turbobrushes are suitable for use with all Miele canister vacuum cleaners.

Ideal for pet owners and households with short-pile carpets.

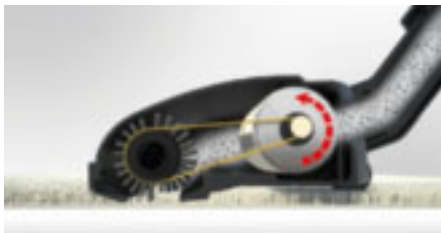

Turbo Comfort Turbobrush STB 205-3

Directly powered by the air stream, the rotating roller brush works to loosen the dirt in the floor while collecting lint, hair and threads. Includes an air adjustment slide that prevents carpets from being sucked in the vacuum cleaner. Optimal for short-pile carpeting.

Electrobrushes

For Deep-Pile And Dense Carpets

Miele Electrobrushes

Thick, deep-pile carpets subjected to excessive wear are particularly difficult to clean as dust, hair and fluff are trodden deep into the carpet. These are best removed when the carpet is brushed and vacuumed simultaneously, in which the long bristles of the electrically powered Miele Electrobrush penetrate deep into the pile of your carpets. The suction power effectively and reliably removes dirt and dust particles. At the same time, the pile is brought up actively by the rotating roller brush resulting in your carpets remaining in great condition and looking beautiful.

For Canisters With Electro Suction Hose

**Electro Premium Electrobrush
SEB 236**

This motor-driven carpet tool is particularly wide for fast and deep cleaning of all carpet depths. Features include a five-level height adjustment to adjust to any depth of pile, integrated LED lighting, swivel neck function for extreme maneuverability and an electrical beater bar for removing persistent soil embedded deep into your carpeting.

**Electro Comfort Electrobrush
SEB 217-3**

Motor-driven with a 10.5" wide brush roll, this floor tool is ideal for the extensive cleaning of low to medium pile carpeting. Features include an electrical beater bar, and swivel neck for maximum maneuverability.

**Electro Plus Electrobrush
SEB 228**

Motor-driven with a 14" wide brush roll, allows for quick and intensive cleaning of all piles of carpeting. Features include a five-level height adjustment, electrical beater bar and swivel neck for maximum maneuverability.

Accessories

For Difficult-To-Access Areas Or Sensitive Surfaces

**Turbo Mini
STB 101**

Directly powered by the air stream, with an air adjustment slide for different surfaces being cleaned. Features a suction inlet of 6" along with a powerful beater bar for fast and efficient removal of hair and threads.

**Dusting Brush
SSP 10**

Thanks to soft, natural bristles this dusting brush can gently clean delicate surfaces and high-quality flooring. Features a flexible adjustable swivel joint and a soft bumper strip to prevent scratches to furniture.

**Extended Flexible Crevice Tool
SFD 20**

With an impressive length of 22" and a flexible central section, this tool makes reaching around furniture and appliances easier than ever! Fits directly onto Miele canister vacuum handles.

**Flexible Mini Turbobrush
STB 20**

For the effortless removal of fluff and hair, such as on furnishings or car seats. Includes a streamlined turbine with powerful suction, a swivel joint for flexibility and a reinforced edge for the removal of stubborn dirt and dust.

**Extended Crevice Tool
SFD 10**

At about one foot long, this tool is excellently suited for cleaning narrow crevices and gaps. Perfect for cleaning behind beds and between car seats. Fits directly onto the handle of Miele canister vacuum cleaners.

**Flexible Hose Extension
SFS 10**

Fitting between the handle and suction tube, the Flexible hose extension provides an additional five feet to the operating radius while vacuuming. Practical storage in the hose sleeve after done vacuuming.
*May only be used on a non-electric hose and wand.

**Radiator Brush
SHB 30**

Durable yet gentle, this brush is made from strong and robust synthetic bristles. A practical helper for cleaning difficult-to-reach areas such as radiators, vents, refrigerator coils and air conditioners.

**Mattress Tool
SMD 10**

For vacuuming gaps between bed frames, mattresses and sofa cushions. Features a thread catcher on its underside for the removal of hair and debris.

**Upholstery Tool
SPD 10**

This extra wide cleaning tool makes pulling stubborn pet hair, lint and dirt from upholstery and curtains fast and easy. Includes an adjustable nozzle for flexibility, and a wide thread catcher on the underside for removal of hair.

**Hygiene Cap
SHV 10**

This unique cap works with active charcoal in order to neutralize all unpleasant odors when the suction hose is removed. Includes a practical clip connection which makes for easy attachment to the suction hose. Replacement occurs on a yearly basis.

**Universal Brush
SUB 20**

With soft, natural bristles and a swiveling neck, the Universal Brush is perfect for dusting bookshelves, mantles, moldings, ceiling fans and sculptures. Features versatile attachment being able to attach to the vacuum handle, suction tube or suction hose. Also includes a soft bumper strip to prevent scratches to furniture.

**Spotlight Handle
SGC 20**

The single touch of a button prompts the LED lighting on the handle, for practical illumination of areas that need to be cleaned. Nothing will go unnoticed while vacuuming in dark closets and spaces.

Accessory Sets

For Careful Cleaning Of Your Home And Car

These practical 4 in 1 sets contain four ideal accessories for individual cleaning requirements. Stored in a convenient high-quality case, they are always on hand.

MicroSet SMC 20

With its micro dusting brush, miniature nozzles and angled extension tool, the MicroSet is ideal for cleaning computers, artwork and other delicate household objects.

Cat & Dog Set SCD 10

The ideal set for pet owners. Includes an Active AirClean Filter that absorbs unpleasant odors, a wide hand-held turbo brush to remove unwanted pet hair, a flexible crevice nozzle for cleaning small spaces and a hygiene cap to seal the open hose connection at all times.

CarCare Set SCC 10

With its flexible crevice tool, compact turbobrush, universal brush and suction hose extension, this collection includes everything you need to quickly and thoroughly clean your car's interior - and so much more.

HomeCare Set SHC 10

For special cleaning tasks around the house, this set of accessories includes a mattress tool, extra-wide upholstery tool, universal brush and suction hose extension that reaches up to five feet.

Original Miele AirClean Filtration System

More Than 99.9% Overall Dust Retention Capacity

The Miele AirClean filter system consists of an original Miele FilterBag™, a motor protection filter and an original Miele exhaust filter. These three filtration stages ensure that vacuumed dust remains securely locked in. The room air is cleaner after vacuuming than before, and it takes longer for dust to settle again on furniture and surfaces.

You can choose from 4 types of Miele exhaust filters to meet your needs:

AirClean Filters

Effective filtration for your everyday needs. More than 99.9% overall dust retention capacity¹⁾ in combination with the AirClean FilterBag™ and motor protection filter.

Active AirClean Filters

Significant reduction of unpleasant odors²⁾
- Ideal for households with pets or smokers

HEPA AirClean Filters

Filters out even the finest dust and allergens – ideal for those allergic to house dust. More than 99.99% dust retention capacity¹⁾, as well as HEPA 13 classification³⁾.

Our Recommendation For Allergy Sufferers:

Those allergic to domestic dust should use vacuum cleaners with an air-tight casing seal and a HEPA filter fitted as standard. These vacuums ensure that the filtered air discharged from the vacuum is cleaner than the ambient room air before vacuuming. As a result, Miele vacuum cleaners are especially recommended for allergy sufferers TÜV Nord, a German material testing institute. To ensure that excellent filtration is maintained over the entire product life, the HEPA filter must be changed approx. once a year.

1) in accordance with EN 60312-1

2) in accordance with DIN EN 13725

3) in accordance with EN 1822/2011

Original Miele Exhaust Filters*

Some original Miele filters are equipped with a Timestrip®. This innovative filter replacement reminder is attached directly to the filter and is activated when the filter is placed in the appliance by pressing firmly on the arrow. When the bar is completely red the filter is saturated and must be replaced. The Timestrip® helps you to monitor your filter and ensure that it is functioning at its best. Only a perfectly functioning exhaust filter ensures that dust is securely locked in, subsequently resulting in clean room air.

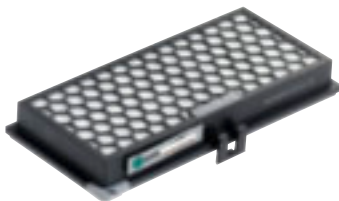

**HEPA AirClean Filter
SF-HA 30**

For all Complete C1, Classic C1, and Dynamic U1 models.

**HEPA AirClean Filter
SF-HA 50**

For Compact C1-C2 and Complete C2-C3 models.

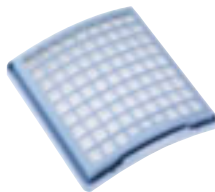

**Active AirClean Filter
SF-AA 30**

For all Complete C1, Classic C1, and Dynamic U1 models

**Active AirClean filter
SF-AA 50**

Original Miele FilterBags™

Securely Lock In All Of The Dust

Reasons Why You Should Only Use Original Miele FilterBags™

The new generation of original Miele AirClean 3D Efficiency FilterBags™ sets new standards in floorcare.

Thanks to several layers of filtration and a special SoftStructure surface, Miele's AirClean system offers maximum dust retention capacity which guarantees that dust is locked securely inside the bag.

The new FilterBags™ offer the highest level of efficiency even when vacuuming on low power levels. This allows you to save energy when vacuuming while having the usual high cleaning performance that you are used to.

3D Technology maximizes the entire volume of the Filter-Bag™.

Only Miele Original Filter-Bags™ are a perfect match for Miele vacuum cleaners, ensuring that the vacuumed dust is guided safely into the bag without ever escaping.

FJM FilterBags™ for Complete C1,
Compact C1 and Compact C2 models

AirClean 3D Efficiency FJM FilterBags™

FJM FilterBags™ can be distinguished by their red bag collar. All dust picked up stays safely inside the bag, filtering more than 99.9% of all fine dust particles. Clean bag replacement guaranteed everytime with automatic bag closure. Contents per box include 4 FilterBags™, 1 motor protection filter and 1 exhaust filter.

GN FilterBags™ for all Complete C2,
Complete C3 and Classic C1 models

AirClean 3D Efficiency GN FilterBags™

GN FilterBags™ can be distinguished by their blue bag collar. All dust picked up stays safely inside the bag, filtering more than 99.9% of all fine dust particles. Clean bag replacement guaranteed everytime with automatic bag closure. Contents per box include 4 FilterBags™, 1 motor protection filter and 1 exhaust filter.

U FilterBags™ for all Dynamic U1 models

AirClean 3D Efficiency U FilterBags™

U FilterBags™ can be distinguished by their green bag collar. All dust picked up stays safely inside the bag, filtering more than 99.9% of all fine dust particles. Clean bag replacement guaranteed everytime with automatic bag closure. Contents per box include 4 FilterBags™, 1 motor protection filter and 1 exhaust filter.

KK Filterbags™ for Swing H1 model

AirClean 3D Efficiency KK FilterBags™

KK FilterBags™ can be distinguished by their yellow bag collar. All dust picked up stays safely inside the bag, filtering more than 99.9% of all fine dust particles. Clean bag replacement guaranteed everytime with automatic bag closure. Contents per box include 5 FilterBags™, 1 motor protection filter and 1 exhaust filter.
