Miele Generation 6000 Dishwashers Offer More for Less
Low Consumption without Sacrificing Performance

Princeton, NJ – Miele’s new line of Generation 6000 dishwashers combine features that are not mutually exclusive concepts: low consumption, cleaning performance and gentle care of dishware.

It begins with a dirty dish—no pre-rinsing required. Once the dishes are loaded, several of the automatic programs require as little as 3.2 gallons of water for up to 16 place settings. Miele dishwashers achieve extremely low consumption rates through the combination of an electronically controlled commercial-grade pump and alternating spray arms. This alternates the water feed to the middle or the top and bottom spray arms respectively using varying pressure levels. Given the higher pump pressure, less water is in circulation at any given time, not only saving water but ensuring the thorough and gentle cleaning of dishware.

With this attention to detail, energy consumption is spared. Depending on the model, the new dishwashers achieve top performance values of 0.73 kWh for 16 place settings in the standard program, reducing consumption per place setting to an incredible 0.045 kWh.

Miele’s unique AutoOpen function serves a dual purpose for both performance and efficiency. This intelligent feature gently opens the door at the end of the rinse and drying cycle, allowing fresh air in. This cools the load faster and makes unloading the machine more convenient. Energy is saved due to a shortened program cycle and difficult to dry items, like plastics, dry even better using the room ambient temperature.

About Miele US

Miele is steadfastly committed to the highest quality, performance and environmental standards. Miele’s range of exceptional consumer appliances includes: ranges; built-in convection, speed, steam and combi-steam ovens; cooktops; ventilation; dishwashers; refrigeration; wine storage;

espresso/coffee systems hoods laundry systems; rotary irons; and vacuum cleaners. The professional division offers laboratory glassware washers, medical washer- disinfectors, dental disinfectors, laundry systems, dishwashers, and a line of marine appliances.

With 11 showrooms available nationwide to explore the product assortment, including the US headquarters in Princeton, NJ, Miele is one of the most desirable brands in household and professional appliances.
