Efficient Ventilation in Elegant Matching Design

Miele introduces ventilation hoods to new built-in appliance generation

Princeton, NJ - Miele has introduced a breath of fresh air to the kitchen with their new line of Puristic ventilation hoods. Perfectly matching the design of Generation 6000 built-in appliances in Brilliant White, Truffle Brown, and Obsidian Black, Miele's new ventilation hoods set the standard in terms of effective features and energy efficiency.

Both models, the DA 6690 W (Puristic wall hood) and DA 6690 D (Puristic island hood), demonstrate a clear integration into the Generation 6000 line of appliances. Similar to their cooking appliance counterparts, touch controls are integrated into the glass screen of the hood canopy.

For down lighting, Miele uses high-power LED Clearview Lighting. These energy efficient lights are an alternative to Halogen and create a naturally warm tone. Developed exclusively for Miele, these LED spotlights are long-lasting, eliminating the need to change lamps over the anticipated 20-year product life cycle.

Another Miele exclusive is the Con@ctivity 2.0 technology offered in both ventilation hood variants. Con@ctivity 2.0 adjusts suction power automatically to what is happening on the cooktop below. Eliminating the need to manually power on the hood, Con@ctivity communicates directly between the cooktop and ventilation hood, creating an immediate response and guaranteeing optimized ventilation and an ideal kitchen climate.

About Miele US
