Operating and Installation Instructions
Commercial Tumble Dryers
PDR 914/918/922/928/944
Caring for the environment

Disposal of the packaging material
The packaging material protects the dryer from transport damage. The packaging materials used are selected from materials which are environmentally friendly for disposal and can therefore be recycled.

Recycling the packaging material reduces the use of raw materials in the manufacturing process and also reduces the amount of waste in landfill sites. Your dealer will take the packaging material away.

Disposing of your old machine
Old electrical and electronic machines often contain valuable materials. However, they also contain harmful substances which were essential for their correct functioning and safety. These could be hazardous to human health and to the environment if disposed of with household waste or if handled incorrectly. Therefore, please do not dispose of your old machine with household waste.

Please dispose of it at your local community waste collection/recycling center for electrical and electronic machines. Consult your dealer if necessary.

Please ensure that your old machine poses no risk to children while being stored for disposal.

It is essential to read these instructions.

This tumble dryer complies with all current local and national safety requirements. Inappropriate use can, however, lead to personal injury and material damage.

Read the Operating Instructions carefully before using the tumble dryer. They contain important information on safety, installation, use, and maintenance. This prevents both personal injury and damage to the tumble dryer.

In accordance with standard UL 60335-1, CAN/CSA-C22.2 No. 60335-1, IEC 60335-1, Miele expressly and strongly advises that you read and follow the instructions in the chapter on installing the tumble dryer as well as the IMPORTANT SAFETY INSTRUCTIONS.

Miele cannot be held liable for injury or damage caused by non-compliance with these instructions.

Keep these Operating Instructions in a safe place and pass them on to any future user.

When instructing other people how to use the tumble dryer, they must be made aware of these IMPORTANT SAFETY INSTRUCTIONS.

Appropriate use

- The tumble dryer is designed for industrial use only.
- The tumble dryer is intended exclusively for drying textiles washed in water which have been labeled as suitable for tumble drying by the manufacturer on the care label. Any other applications may be dangerous. Miele cannot be held liable for damage resulting from incorrect or improper use or operation.
- This tumble dryer is not intended for outdoor use.
- Do not install the tumble dryer in a room where there is a risk of frost. At temperatures around freezing point, the tumble dryer may not be able to operate properly. The permitted room temperature is between 40°F and 95°F (2°C and 40°C).
- If the machine is operated in the commercial sector, it may only be operated by trained or qualified personnel. If the machine is operated in an unsecured location, the supervisor must ensure that its use does not pose a risk.
- The tumble dryer can only be used by people with reduced physical, sensory, or mental capabilities, or lack of experience or knowledge, if they are supervised while using it or have been shown how to use it in a safe way and understand and recognize the consequences of incorrect operation.
- Children must be kept away from the tumble dryer unless they are constantly supervised.
- Children should be supervised in the vicinity of the tumble dryer. Never allow children to play with the tumble dryer.
- Uses other than those listed above are not recommended and shall release the manufacturer from liability.
IMPORTANT SAFETY INSTRUCTIONS

Preventing misuse

► Do not make any alterations to the tumble dryer, unless authorized to do so by Miele.
► Do not lean on the dryer door. Otherwise, the tumble dryer may tip over, causing injury to yourself or others.
► Do not use a pressure washer or hose to clean the tumble dryer.
► To ensure the correct performance of the tumble dryer and to prevent malfunctions and fire hazards, it is important to carry out maintenance on a regular basis.
► Do not store or use gasoline, petrol, paraffin, or other highly flammable liquids near the tumble dryer. Risk of fire and explosion.
► Do not expose the tumble dryer to air which contains chlorine, fluorine, or other solvent vapors. This contaminated air can cause a fire.
► To prevent the risk of fire, the following items must not be dried in the tumble dryer:
  - Items which have not been washed.
  - Items which have not been thoroughly cleaned and are still soiled with grease, oil, or other deposits (such as kitchen linens or cosmetics cloths with cooking oils, grease, lotions, etc). If items have not been thoroughly cleaned, there is a danger that they might ignite when heated, even after they have been removed from the tumble dryer at the end of the program.
  - Items (e.g., mops and floor cloths) that have been treated with inflammable cleaning agents or which contain residues of acetone, alcohol, benzene, petrol, kerosene, stain remover, turpentine, wax and wax remover, or other chemicals.
  - Items which have been soiled with hair lacquer, hair spray, nail polish remover, or similar substances.
Wash heavily soiled items thoroughly by increasing the amount of detergent and selecting a high washing temperature. If in doubt, wash the items several times.
► Warning: Never switch the tumble dryer off before the end of the drying program. If you absolutely must interrupt the program, remove all items immediately and spread them out to cool down.
► Never operate the tumble dryer without the lint filter or with a damaged lint filter. This could lead to malfunctions. Lint can clog the air passages, heating elements, and ducting, which could result in a fire. In this case, stop the tumble dryer immediately and replace the damaged lint filter.

Technical safety

► Before installing the dryer, check it for visible signs of damage.
  Do not install or use a damaged machine.
► Do not connect the dryer to the electrical supply by an extension cord (risk of fire due to overheating).
► Risk of fire. This tumble dryer must not be connected to a controllable socket (e.g., a timer). There is a risk of the laundry igniting if the tumble dryer’s safety cooling phase is interrupted.
IMPORTANT SAFETY INSTRUCTIONS

The electrical safety of this dryer can only be guaranteed when continuity is complete between it and an effective grounding system. It is essential that this standard safety requirement is observed and regularly tested. If in any doubt, please have the electrical installation inspected by a qualified electrician. Miele cannot assume responsibility for the consequences of an inadequate grounding system.

Unauthorized repairs could result in unforeseen dangers for the user, for which Miele cannot accept liability. Repairs should only be carried out by a Miele authorized technician, otherwise any subsequent damage will not be covered by the warranty.

Faulty components must only be replaced by Miele original parts. Miele can only guarantee the safety standards of the machine when Miele replacement parts are used.

In the event of a fault and for cleaning purposes, the tumble dryer must be disconnected from the power supply. The tumble dryer is only disconnected from the power supply, if:
- the plug is withdrawn, or
- the breakers are disconnected, or
- the breakers have been completely removed.

For further information; see “Installation – Electrical connection”.

The tumble dryer may not be used in mobile installations (e.g., on ships).

Follow the instructions in “Installation” and “Technical data”.

The tumble dryer may only be operated when the ducting has been installed and the room is sufficiently ventilated in accordance with all local codes.

The ducting must never be installed in any of the following flues or shafts:
- Chimneys or smokestacks that are in use.
- Shafts that are used to ventilate installation rooms with fireplaces.
- Flues that are used by third parties.

Smoke or exhaust gas that is fed back into the flue or shaft may be toxic.

Regularly check all components in the ducting (e.g., wall pipe, external grille, bends, elbows, etc.) to make sure that air can move through them and to ensure that they are working properly. Clean components when necessary. Lint deposits in the ducting system will prevent the air from being extracted properly and, as a result, will stop the tumble dryer from working properly.

If existing ducting is due to be used, it must be checked before being installed in the tumble dryer.

There is a risk of suffocation and poisoning due to exhaust gases being sucked back if gas-powered flow heaters, gas-powered room heaters, coal-burning stoves with a flue connection, etc., are installed in the same room, in the same apartment, or in neighboring rooms and the negative pressure is 4 Pa or more.

The following measures for suitable room ventilation (examples) can help to prevent negative pressure in the installation area:
- Install vents that cannot be closed in the exterior walls.
- Use window switches so that the tumble dryer can only be switched on when a window is open.
IMPORTANT SAFETY INSTRUCTIONS

Please always seek approval from the appropriate authority (gas installer, chimney sweep, etc.) to confirm that the machine can be operated without risk and that negative pressure of over 4 Pa can be prevented.

- If multiple tumble dryers are to be connected to one exhaust air duct, a non-return flap must be installed directly on the duct for each tumble dryer.

If this requirement is not observed, the tumble dryers may be damaged and their electrical safety could be affected.

- The electrical socket must be easily accessible so that the tumble dryer can be disconnected from the electrical supply.

- If the appliance is hard wired, protective measures must be made on site to disconnect the tumble dryer from the electrical supply.

- Do not block the gap between the bottom of the tumble dryer and the floor with toe-kicks, deep pile carpet, etc.

- Ensure that no closeable door, sliding door, or an oppositely hinged door is installed that would hinder the drum door being opened in any way.

- If the power cord is damaged, it must be replaced by a Miele authorized technician in order to protect the user from harm.

Correct use

- Always close the drum door after each drying cycle. This will prevent:
  - Children climbing into the tumble dryer or hiding things in it.
  - Pets or other small animals climbing into the tumble dryer.

- Keep the room where the tumble dryer is located free from dust and lint. If the air that is taken into the machine contains dirt particles, this can cause blockages. A fault may then occur and there is a risk of fire.

- Never operate the tumble dryer without the lint filter or with a damaged lint filter. This could lead to malfunctions. Lint can clog the air passages, heating elements, and ducting, which could result in a fire. In this case, stop the tumble dryer immediately and replace the damaged lint filter.

- The lint filter must be cleaned on a regular basis.

- To ensure problem-free operation of the tumble dryer:
  - Remove the lint from the lint filter surfaces after every drying cycle.
  - Dry the lint filter after wet cleaning. Wet or damp lint filters/filters could cause operational faults while drying.
  - In addition, the lint filter and the air passages must be cleaned when prompted by the display.

- Remove all items from pockets (e.g., lighters, matches).

- The program finishes when the cooling phase starts. Many programs are followed by a cooling phase to ensure that the items are not too hot to handle when you remove them (this also reduces the risk of the laundry self-igniting). Always remove all items of laundry from the tumble dryer immediately after the end of the program.
IMPORTANT SAFETY INSTRUCTIONS

▸ Fabric softener and similar products must be used according to the instructions on the manufacturer’s packaging.

▸ For machine parts made from stainless steel:
Avoid contact between stainless steel surfaces and liquid detergents or disinfecting agents which contain chlorine or sodium hypochlorite. These agents can cause corrosion on stainless steel.
Aggressive chlorine bleach vapors can also be corrosive.
Do not store open containers of these agents near the machines.

Accessories

▸ Only use genuine Miele spare parts and accessories with this machine. Using parts or accessories from other manufacturers may invalidate the warranty, and Miele cannot accept liability.

⚠️ Miele cannot be held liable for damage caused by failure to comply with these IMPORTANT SAFETY INSTRUCTIONS.
Operating the tumble dryer

Control panel

1. 📝 sensor button
   For selecting the current user language
   When the program ends, the language is automatically reset to the language set at the Supervisor level.

2. ← sensor button
   Takes you back one level in a menu.

3. Touch display

4. Start/Stop sensor button
   For starting the selected drying program and canceling a program once it has started.
   The program selected can be started as soon as the sensor button starts flashing.

5. Optical interface
   For Miele Service

6. 🌋 button
   For switching the tumble dryer on and off. The tumble dryer switches off automatically to save energy. It is switched off an adjustable time after the end of the program/Anti-crease phase, or after being switched on if no further selection is made.

7. Emergency shut-off
   It should only be activated in the event of danger or in order to prevent danger. When this switch is activated, the machine is immediately switched off and put in a safe condition. Once the danger has been averted, the switch can be unlocked again by turning the knurled dial to the right.
Operating the tumble dryer

Sensor buttons and touch display with sensor buttons
The iants, ←, and Start/Stop sensor buttons and the sensor buttons in the display react to finger-tip contact. Every tap of a sensor button is confirmed with an audible keypad tone. You can adjust the volume of the keypad tone or switch it off (see “Supervisor level”).

The control field with sensor buttons and the touch display can be scratched by pointed or sharp objects, e.g., pens.
Only touch the control field with your fingers.

Main menu
After switching on the tumble dryer, the main menu will appear in the display. You can access all the important sub-menus from the main menu.

Touch the  sensor button at any time to return to the main menu. Values set previously are not saved.

“_programs” menu
In this menu, you can select the drying programs.

“favorites” menu
In this menu, you can select 1 favorite program from a total of 12 favorite programs. The drying programs can be set up and saved by the supervisor in the favorites menu (see “Supervisor level” under “Favorite programs”).

“Supervisor” menu
You can alter the tumble dryer’s electronic to suit changing requirements in the Supervisor level (see “Supervisor level”).

Operating examples
Option lists
Scrolling through the “_programs” menu (single selection)
To scroll through the menu, place your finger on the touch display and move it left or right.

The orange scroll bar in the bottom display area shows that there are further options to choose from.

To select the required drying program, touch the program name with your finger. The display will now change to the standard menu for that program.

“Extras” menu (multiple selection)

To select one or more Options, touch the required Options with your finger. Currently selected Options are highlighted orange. To deselect an option, simply touch the option again.

Setting numerical values

You can set numerical values in some menus. You can set the numerical values by swiping your finger up and down on the display.

Place your finger on the number that you want to change.

To set the required number, swipe your finger up or down on the display.

Confirm the set numerical value by touching the OK sensor button.

Tip: For some settings, depending on the value range and increments, the value can also be set using a numerical keypad. Briefly touching the numbers will bring up the numerical keypad. Once a valid number has been entered, the OK sensor button will be highlighted green.

Briefly touch a number between the two lines with your finger.
Operating the tumble dryer

The numeric block will flash.

To enter the numerical value, touch the numbers on the right-hand side and then confirm with OK.

Pull-down menu

The pull-down menu can be used to display information (e.g., about a drying program).

If an orange bar appears at the top of the screen in the middle of the display, you can open the pull-down menu. Touch the bar and drag down with your finger.

To close the pull-down menu again, touch the orange bar and drag it upward with your finger.

Exiting the menu

- Tap the sensor button to return to the previous screen.

Entries made before this which have not been confirmed with OK will not be saved.

Help display

With some menus, Help appears along the bottom line of the display.

- If you need more information about the current menu, touch the Help sensor button.

The additional information is shown in the display.

- Touch the sensor button to return to the previous screen.
Before using for the first time

⚠️ Risk of injury or damage to property due to improper installation.
Incorrect installation of the tumble dryer can lead to personal injury or damage to property.
Before using the tumble dryer for the first time, make sure it has been installed and connected correctly.
See the information in the section on “Installation”.

Complete the initial commissioning process. During the initial commissioning process, you will need to define the settings for daily use of the tumble dryer. Some settings can only be modified during the initial commissioning process. After that, they can only be changed by Miele Service.

These settings are also described under “Supervisor level”.

Switching on the tumble dryer

- Press the button.
The welcome screen will light up.

Setting the display language

You will be asked to select the display language. You can change the language at any time (see “Language” under “Supervisor level”).

- Swipe left or right across the display with your finger until the language you want appears.
- Briefly touch the required language with your finger.
The selected language will be highlighted in orange and the display will change to the next setting.

Reference to optional external machines

Before initial commissioning, connect the Connector box and/or slide a communication module into the slot on the back of the tumble dryer. For this purpose, the tumble dryer must be disconnected from the power supply. Then start the commissioning process.
Before using for the first time

A reference to optional external hardware appears. Confirm the information with the OK sensor button.

**Setting the display brightness**
You will be asked to select the brightness of the display.

Touch the segment bar for the required level of brightness.
The selected level of brightness is represented by the length of the segment bar.
Confirm with the OK sensor button.
The display will change to the next setting.

**Setting the date**

Place your finger on the value that you want to change and move your finger upward or downward.
Once all values have been selected, confirm your entry with the OK sensor button.
The display will now change to the next setting.

**Setting the time**

Place your finger on the number that you want to change and move your finger upward or downward.
Confirm with the OK sensor button.
The display will change to the next setting.
**Selecting program packages**

You can select various programs from the program packages. Any programs already active are highlighted in orange.

- Swipe to the left until you reach a program that is not highlighted in orange.
- Touch the program to be activated.

The selected program is now active highlighted in orange. You can select further programs if required.

- If you do not want to select any more programs, confirm with OK.

The display will change to the next setting.

**Tip:** You can disable a selected program by touching the program again. Exception: The **Cottons** and **Cottons PRO** programs cannot be disabled.

**Setting up a payment system**

If you wish to set up a payment system, read the “Payment system” section of the “Supervisor level” chapter. These settings can only be changed during the initial commissioning process. If you wish to change the settings after the commissioning process, please contact Miele Service.

If you do not wish to set up a payment system, you can skip this stage.

**Skipping payment system setup**

- Touch the **No payment system** sensor control.
- Tap OK to confirm.

The display will change to the next setting.

**Completing the initial commissioning process**

The initial commissioning process is complete when a program lasting longer than 10 minutes has been carried out in full.
Before using for the first time

If the power is interrupted prior to the start of the first drying program (e.g., if the machine is switched off with the button), the initial commissioning process can be completed again. Once a drying program has been running for over 10 minutes, the initial commissioning process cannot be performed again.

- In the main menu, touch the Programs sensor button.

- Swipe to the left until the Timed drying cool air program is displayed.

- Touch the Timed drying cool air program.

- Touch the flashing Start/Stop sensor button.

After this program has finished, the tumble dryer is ready for use.
1. Notes on correct laundry care

Washing

Heavily soiled laundry must be washed particularly thoroughly. Use sufficient detergent and select a high wash temperature. If in doubt, wash the items several times.

New, colored items must be washed thoroughly and separately. Do not dry these items with light-colored garments. There is the risk of colors running and discoloring other garments or even plastic components in the tumble dryer. Dark-colored fibers can also settle on light-colored garments and vice versa.

Drying

⚠️ Damage due to foreign objects which were not removed from the laundry.
Foreign objects in the laundry can melt, burn, or explode.
Ensure that any foreign objects (e.g., detergent dispensing balls, lighters, etc.) have been removed from the laundry.

⚠️ Risk of fire due to incorrect use and operation.
The laundry can burn and destroy the tumble dryer and the surroundings.
Read and observe the “IMPORTANT SAFETY INSTRUCTIONS”.

- Check seams and stitching to ensure that padding and linings are intact. This way you will avoid the danger of fillings coming out and causing a fire.

- Sew in or remove underwiring from bras.

Care symbols

</tr>
<tr>
<td>Do not tumble dry</td>
<td>Do not iron</td>
</tr>
</tbody>
</table>
2. Loading the tumble dryer

Textiles may be damaged. Before loading, read chapter “1. Notes on correct laundry care” first.

- Open the door.
- Load laundry into the tumble dryer.

Do not overload the drum. Overloading can cause unnecessary wear and tear to the laundry and cause a disappointing drying result. It can also cause more creasing.

Closing the door

⚠️ Damage caused by laundry getting trapped.
Laundry can be damaged by getting trapped when closing the door.
When closing the door, make sure that laundry does not get trapped in the door opening.

- Shut the door gently.

3. Selecting a program

- Press the button.
The welcome screen will light up.
There are different ways to select a drying program in the main menu.

- Touch the Programs sensor button.
Drying

- Swipe to the left until you reach the required program.
- Touch the sensor button for that program.

The display will change to the standard menu for that drying program.

Alternatively, you can select a program from the Favorites list.

The pre-set programs under ☆ Favorites can be changed via the Supervisor level.

- Touch the ☆ Favorites sensor control.
- Swipe to the left until you reach the required program.
- Touch the required program.

The display will change to the standard menu for that drying program.

4. Selecting program settings

Selecting the drying level

The pre-set drying level for many programs can be changed if required. Different drying levels are available depending on the program.

Selecting extra options

The drying programs can be augmented with various Options. Some Options can only be selected for certain drying programs.
Drying

Touch the Extras sensor button.

Touch the sensor button for the option you want.

Only press OK when the option appears on the display.

The relevant symbol for the selected option (️ or ⭐️) lights up.

️ Gentle

Sensitive items are dried with less mechanical movement (fewer drum rotations).

⭐️ Anti-crease

After the program has finished, the drum will continue to rotate in a certain rhythm, depending on the selected program. This helps to prevent creasing after the program has ended.

The Anti-crease function is switched off as the factory default setting. The Anti-crease function can be switched on in the Supervisor level with a variable duration of up to 12 hours. You can find this setting in the Supervisor level under the Process technology/Anti-crease menu.
5. Starting a program

Payment system (optional)  If your machine is connected to a payment system, the amount of payment required will appear in the display.

Money may be lost if the drum door is opened or the program is canceled. Depending on the settings, money may be lost in the payment system if the drum door is opened or the program is canceled. Do not open the door once the program has started. Do not cancel a drying program while it is running.

Starting a program  The program can be started as soon as the Start/Stop sensor button is flashing on and off.

- Touch the Start/Stop sensor button.

If a delay-start period has been selected, this will appear in the display.

The drying program will start either straight away or once the delay-start period has elapsed. The program time left is shown in the display.

Calling up current program parameters  While the program is running, you can use the pull-down menu to view the parameters of the current drying program (e.g., drying level, load capacity, selected Options, drying temperature).

- To call up the pull-down menu, swipe your finger from top to bottom while the program is running.

The pull-down menu displays the parameters of the drying program.

- To close the pull-down menu again, swipe your finger from bottom to top.

Program duration/Time left estimation  The program duration depends on the quantity of laundry, the type of fabric and the residual moisture in the laundry. The displayed program duration for drying-level programs can therefore vary or “jump”.

11:02
Time left h:
2:27
Status
Cottons
Drying

Parameter info
Normal
7.0 kg
64°C

11:02
Time left h:
2:27
Status
Cottons
Drying
Drying

The tumble dryer’s electronic adapts during the ongoing drying program. The displayed program duration becomes more and more accurate.

When using the programs for the first time, the displayed time sometimes deviates significantly from the real time left. The difference between the estimated and achieved time becomes smaller if the corresponding program is run more often. If different load sizes are dried in one program, the time left display can only show an approximate time.

Program end

The laundry will be cooled down shortly before the end of the program. The message Finish/Cooling down will appear on the display during the cooling phase. The laundry can now be unloaded.

After the cooling phase and the drying program is completed, the message Finish is displayed.

The tumble dryer will switch off automatically after the set time after the end of a program.

If the Anti-crease (Anti-crease)* option has been selected, the drum continues to rotate in intervals. This reduces creasing if the laundry cannot be unloaded straight away.

* The Anti-crease function is switched off as the factory default setting and can be activated in the Supervisor level.

Removing the laundry

- Open the door.
- Remove everything from the drum.

Items left in the dryer could be damaged by over-drying when the dryer is used the next time.
Always remove all items from the drum.

- Switch the tumble dryer off by pressing the button.

Care notes

This tumble dryer requires regular maintenance, particularly if it is used on a continuous basis. Please see “Cleaning and care” for details.
**Timer**

**Prerequisite for setting the timer**

The Delay start must be activated in the Supervisor level in the Controls / Display menu so that the Timer can be selected. Before the program starts, the Timer can be used to select a program start time or program end time.

**Setting the timer**

- Touch the Timer sensor button.
- Select the Finish at, Start in, or Start at option.
- Set the hours and the minutes and confirm your entry with the OK sensor button.
Changing the program sequence

Changing a program once it has started
You cannot change to another program once a program has started (this prevents unintentional alterations). You will need to cancel the current program before you can select a new one.

⚠️ Risk of fire due to incorrect use and operation.
The laundry can burn and destroy the tumble dryer and the surroundings.
Read and observe the “IMPORTANT SAFETY INSTRUCTIONS”.

Canceling a program
- Touch the Start/Stop sensor control.
A message will appear in the display asking if you wish to cancel the program.
- Touch the Yes sensor control.

Reselecting a canceled program
- Open and close the door.
- Select and start a new program.

Adding laundry during ongoing Delay Start period
You can open the door to add or remove laundry.
- All program settings will be saved.
- You can still change the drying level, if required.
- Open the door.
- Remove or add the laundry.
- Close the door.
- Touch the Start/Stop sensor button so that the Delay Start period continues.

Time left
Altering the program sequence can cause the program duration shown in the display to be adjusted.
Cleaning the lint filter

⚠ Risk of fire if the tumble dryer is operated without a lint filter.
If there is no lint filter, the air channels, heating elements, and ducting can become
clogged during drying and may catch fire.
The lint filter must not be removed for cleaning.
Never operate the tumble dryer without the lint filter in place.
Replace a damaged lint filter immediately.

A lint filter collects lint released by textiles. The lint filter must be cleaned at least once ev-
ery working day as well as whenever a prompt to clean it appears in the display. In the
event of a heavy build-up of lint, the lint filter should be cleaned several times per day.

- Open the lint filter compartment cover.
- Remove the lint from the lint filter using your hands.
  Do not use pointed or sharp-edged objects to clean the lint filter.
  Otherwise, the lint filter may become damaged.
- Close the lint filter compartment cover after cleaning the lint filter.
Cleaning and care

Cleaning the drum and the outside of the casing

⚠️ Risk of death due to electric shock.
The tumble dryer must be completely disconnected from the electricity supply before performing cleaning or maintenance work.
Before starting cleaning or maintenance work, always switch off the tumble dryer at the circuit breaker (on site).
Do not use a pressure washer or hose to clean the tumble dryer.

- Clean the tumble dryer casing, control field, and plastic parts with a **mild** cleaning agent or with a soft, damp cloth only. Then rub the tumble dryer casing, control field, and plastic parts dry.

Abrasive cleaning agents must not be used to clean the tumble dryer.

- The tumble dryer drum must be wiped clean with a soft, damp cloth after drying items that have been starched.

- Check the seal.

- Check the latches on the drum door and lint filter compartment cover.

The air intake vent is located on the rear of the tumble dryer.
This vent must never be covered or blocked with objects.
Keep the area around the tumble dryer – in particular the air intake – clear of lint.

Additional annual cleaning

Miele Technical Service or a trained specialist must check the interior of the tumble dryer and the ducting for lint deposits **once per year** and clean the machine if necessary. In the case of electrically-heated tumble dryers, the heater bank and the heating shaft must also be checked by Miele Technical Service Department. In the case of gas-heated dryers, the burner and the burner area must be checked.
Contact in case of fault

In the event of a fault which you cannot remedy yourself, please contact your Miele dealer or Miele Technical Service.

Contact information for Miele Technical Service can be found at the end of this document.

Please quote the model and serial number of your appliance when contacting Miele. Both pieces of information can be found on the data plate.

Optional accessories

Optional accessories for this tumble dryer are available from your Miele dealer or Miele Technical Service.
Installation requirements

The tumble dryer must only be installed and commissioned by Miele Service or an authorized dealer.

- The tumble dryer should be installed in accordance with all relevant regulations and standards.
- The dryer must only be operated in a room that has sufficient ventilation and which is frost-free.

General operating conditions

This dryer is intended only for use in a commercial environment and must only be operated indoors.

Do not install the tumble dryer in a room where there is a risk of frost.

Depending on the nature of the installation site, sound emissions and vibration may occur.

**Tip:** Have the installation site inspected and seek the advice of a professional in instances where increased noise may cause a nuisance.

Transport

The tumble dryer must not be transported without a transport pallet.

Suitable transport aids must always be used during transportation.

At the installation site, the tumble dryer must be lifted from the transport pallet using suitable lifting gear.

Installing the tumble dryer

- Place the tumble dryer on a perfectly level, secure, and horizontal surface that is able to withstand the specified floor load.

The floor load created by the tumble dryer is concentrated and transferred to the installation surface via the screw feet. A base is not required. However, an uneven floor surface must be compensated for.
To facilitate any future maintenance work, a maintenance corridor with a width of at least 19 11/16" (500 mm) must be set up behind the machine and must be accessible at all times. The distance between the machine and any walls must not fall below the specified minimum values.

Adjust the tumble dryer screw feet until the machine is level. After the machine has been aligned, screw the washers tightly to the base plate using a screwdriver.
Tip: Use a level to ensure correct alignment.

Securing the machine

- The tumble dryer must be secured to the floor by installing the tensioning strips supplied over the machine feet.

The material provided is intended for use in bolting the machine to a concrete floor. If other floor types are present at the installation site, the fastening material must be ordered separately.
Electrical connection

The electrical connection must be carried out by a qualified electrician.

- The tumble dryer should only be connected to an electrical supply provided in accordance with all appropriate local and national legislation and regulations. Please also observe the regulations set out by your insurance provider and energy supplier, accident prevention regulations, as well as recognized codes of practice.

- Reliable and safe operation of this tumble dryer is only ensured if it has been connected to the electrical supply.

The required supply voltage, power rating, and fuse rating can be found on the data plate on the tumble dryer. Ensure that the supply voltage matches the voltage quoted on the data plate before connecting the tumble dryer to the electricity supply.

Connection to a supply voltage other than the one quoted on the data plate can damage the tumble dryer if the voltage is too high.

- If more than one voltage is specified on the data plate, the tumble dryer can be converted for connection to the relevant input voltage. This conversion must be performed by Miele Service or by an authorized dealer only. The wiring instructions on the wiring diagram must be followed.

  The tumble dryer can either be hard-wired or connected using a plug-and-socket connection in accordance with all local codes. For a hard-wired connection, an all-pole disconnect switch must be available at the installation site.

  If the electricity supply cannot be permanently disconnected, the disconnect switch (including plug and socket) must be safeguarded against being switched on either unintentionally or without authorization.

- The tumble dryer must not be connected to devices such as timers which would switch it off automatically.

- If it is necessary to install a residual current device (RCD) in accordance with local regulations, a residual current device type B (sensitive to universal current) must be used.
Supply air/exhaust air
The tumble dryer may only be operated when the ducting has been connected properly and the room is sufficiently ventilated.

Steam connection (only for steam-heated variants)
The steam connection must only be carried out by an authorized installation technician. The enclosed installation instructions must be observed as they are important for the steam connection.

Hot water connection (only for hot water-heated variants)
The hot water connection may only be carried out by an authorized installation technician.
The enclosed installation instructions must be observed as they are important for the hot water connection.
If a faucet is desired, it must be installed on site.

Gas connection (only for gas-heated variants)
The gas connection must only be carried out by an authorized installation technician in accordance with the applicable national regulations (see installation instructions).
The use of a gas socket is not permitted at the specified heater rating as the flow rate is too low.
The gas heating is configured at the factory in line with the gas specifications on the sticker on the rear of the machine.
If the gas family is changed, a conversion kit must be requested from Miele Service (please specify the machine type, serial number, gas family, gas group, gas connection pressure, and country of installation). Follow the installation instructions. This conversion may only be carried out by an authorized specialist.

⚠️ Risk of electric shock and injury due to using the tumble dryer without the complete casing.
If the casing is dismantled, it is possible to come into contact with live or rotating machine parts.
Once the tumble dryer has been installed, completely replace all the casing parts that were removed.
Optional accessories

Only use genuine Miele spare parts and accessories with this machine. Using parts or accessories from other manufacturers will invalidate the warranty, and Miele cannot accept liability.

Connector box
The optional Connector box allows external hardware from Miele and other suppliers to be connected to the Miele Professional Machine. External hardware includes, e.g., payment system, peak-load system, pressure sensor, or an external vent flap.

The Connector box is supplied with supply voltage by the Miele Professional Machine.

XKM 3200
The optional Miele Communication Module can be used to establish a data connection between a Miele Professional Machine and a data processor in accordance with the Ethernet or WiFi standard.

The communication module is intended exclusively for commercial use and is supplied with supply voltage directly via the Miele Professional Machine. No additional power connection is required. The Ethernet interface provided via the communication module complies with SELV (safety extra low voltage) requirements. Connected external machines must also comply with SELV.

Data protection and data security
When you activate the networking function and connect your machine to the Internet, your machine sends the following data to the Miele Cloud:
- Machine serial number
- Machine model and technical features
- Machine status
- Information about the software status of your machine

Initially, this data cannot be assigned to a specific user and is not saved permanently. Data cannot be saved permanently or assigned to a specific user until after you have linked your machine to a user. Data transmission and processing are governed by Miele’s strict security standards.

Factory default settings for network configuration
You can reset all of the settings on the communication module or your integrated WiFi module to the factory default settings. The network configuration should be reset whenever a machine is being disposed of or sold, or if a used machine is being put into operation. This is the only way to ensure that all personal data has been removed and the previous owner will no longer be able to access the machine.
Optional accessories

Copyrights and licenses
For the purpose of operating and controlling the communication module, Miele uses proprietary or third-party software that is not covered by open-source licensing terms. This software/these software components are protected by copyright. The copyright powers of Miele and third parties have to be respected.

Furthermore, this communication module contains software components which are distributed under open-source license conditions. The open-source components contained in the machine along with the corresponding copyright notices, copies of the licensing conditions valid at the time, and any additional information can be accessed locally by IP via a web browser ([https://<IP address>/Licenses](https://<IP address>/Licenses)). The liability and warranty provisions of the open-source licensing conditions as stated therein apply only in relation to the respective right holders.

Payment system
The tumble dryer has the option of being controlled by a payment system (e.g., for operation in self-service laundromats). Payment systems for cash-free transactions and payment systems with mechanical or electronic coin validators are available as optional accessories for individual target groups.

The programming required for connecting a payment system must be carried out by Miele Customer Service or an authorized Miele dealer only. An external power supply is not required for a payment system.
Opening the Supervisor level

Touching the sensor button takes you to the Supervisor level.

Access via code

The supervisor level is accessed using a code.

Factory default: The code is **000**.

Change code

You can alter the supervisor-level access code to protect the tumble dryer from unauthorized access.

Carefully enter a new code.
Please inform Technical Service if you have forgotten your new code. Technical Service will have to reset the code.
Make a note of your new code and store it in a safe place.

Closing the settings menu

- Touch the sensor control.
The display will then go back to the previous menu level.
- Touch the sensor control.
The display will change to the main menu.

Controls / Display

Language

The display can be set to appear in one of several different languages. To select the language you want, go to the *Languages* sub-menu.

You can change the language as follows:
- Permanently using the supervisor level (= “Supervisor language”).
- For the duration of the current program only using the sensor control. The supervisor language is displayed again at the end of the program.

Language entry

The display can be set to one of several different user languages. This setting allows you to determine how languages can be selected.

You can change the language as follows:
Supervisor level

International
6 languages are available. The sensor button is not active. Note the setting Set languages.

Language setting
The sensor button can be used to select a language. All languages are available (factory default).

You can change the order of the first 4 languages. These slots are allocated to the most commonly used languages.

Standard language
The user language cannot be changed. The user language is the same as the supervisor language. The sensor button is not active.

Set languages
The languages for the International lang. entry setting can be changed.

6 languages can be selected. All languages are available.

If you wish to add a new language to the language menu:

- First select the language you want to replace.

All available languages are displayed.

- Select and confirm the language to replace the previous language.

The new language appears instead of the old one.

Display brightness
The brightness of the display can be altered. The setting depends on the various lighting conditions in the place of installation.

- It can be set to one of 10 different levels.

Clock display
After selecting the clock format, you can set the time of day.

Clock format
- Factory default: 24-hour display
- 12-hour display
- No clock

Set
- The time can be set.

Date
The date can be set after selecting the date format.

- Date format
  - The date can be shown starting with the day, month, or year.
- Date
The date is set.

**Volume**

The volume for various sounds can be changed.

The volume can be changed for the following tones:

- Finish tone
  The finish tone signals the end of the drying program.
- Keypad tone
- Welcome tone
- Fault alarm
  The fault tone signals a fault and can be switched off. The volume of the fault tone cannot be adjusted.

**Res. moisture display**

In addition to displaying the drying level, the residual moisture can also be indicated as a percentage.

- **Factory default:** Without % value
- With % value

**Visibility parameters**

Various parameters are offered/displayed when a program is selected. You can decide which parameters should not be displayed. These parameters can then not be edited during program selection.

- Residual moisture
- Duration
- Low temperature
- Anti-crease
- Load size
- Drying temperature

**Display off status**

The display switches off to save energy; only the Start/Stop sensor control flashes slowly. You can change this setting.

Changing this setting leads to increased energy consumption.

- Off
  No switching off
- On (10 min.) Not curr.prog.
  The display will remain on while the program is running but will go out 10 minutes after the end of the program.
- Logo (10 min.) Not curr.prog.
  The display will remain on while the program is running but the logo will light up 10 minutes after the end of the program.
**Supervisor level**

- **Factory default:** On after 10 min.
  The display is switched off after 10 minutes.

- **On (30 min.) Not curr.prog.**
  The display will remain on while the program is running but will go out 30 minutes after the end of the program.

- **Logo (30 min.) Not curr.prog.**
  The display will remain on while the program is running but the logo will light up 30 minutes after the end of the program.

- **On after 30 min.**
  The display will go out after 30 minutes.

**Machine off status**

In order to save energy, the tumble dryer will switch off automatically after the end of the program or if no further selection is made. You can change this setting.

Changing this setting leads to increased energy consumption.

- **No switch off**
- **Factory default:** Switch off after 15 minutes
- **Switch off after 20 minutes**
- **Switch off after 30 minutes**

**Delay start**

The delay start (timer) can be activated or deactivated.

- **Factory default:** Off
- **On**

**Memory**

The tumble dryer saves the settings that were selected last for a drying program (drying level and/or extra option, or the duration for some programs).

- **Factory default:** Off
- **On**

**Temperature unit**

You can select the unit for the temperature display.

- **Factory default:** °C
- **°F**

**Weight unit**

You can decide whether load quantities are displayed in “kg” or “lb”.

- **Factory default:** kg
- **lb**
Change code

You can alter the access code to the supervisor level.

- Enter the current code.
- Enter a new code.

Program selection

Controls

You can select whether the tumble dryer is operated as a “laundromat” machine. Shortcuts are the easiest way to operate the machine. Operating staff are unable to change pre-set programs.

Tip: Start by configuring all necessary settings and changes to the tumble dryer before adjusting any of the options below.

Caution: When activating any of these options, the supervisor level will no longer be available.
You will no longer be able to access the supervisor level via the display. Please follow the instructions below if you wish to change any other settings.

Opening the supervisor level (laundromat version)

- Switch the tumble dryer on and open the dryer door.

1 Touch the Start/Stop sensor control and hold it down while carrying out steps 2–3.
2 Close the tumble-dryer door.
3 Wait until the Start/Stop sensor control, which will now be flashing quickly, lights up constantly ...
4 ... and then release the Start/Stop sensor control.

- Standard
  Factory default: All (selected) programs are available.
  - Laundromat, basic
    4 programs are available.
  Under Favorite programs, you can set which 4 programs to select/modify.

- Laundromat Logo
  12 programs are available.
  Under Favorite programs, you can set which 12 programs to select/modify.
  The first 3 programs can be selected directly. The remaining programs are selected via another list.

- Laundromat Logo ext. time
  4 timed-drying programs* with different temperature levels are time-controlled via an external payment system.
  The set value indicates the program duration and cannot be modified by the user.
  This option is only available with an external payment system.
Supervisor level

* The maximum program duration is specified during initial commissioning.

- **Laundromat Logo int. time**
  4 timed-drying programs* with different temperature levels are time-controlled via the tumble dryer's electronic.
  The set value indicates the maximum program duration and can be modified by the user.

- **External prog. selection**
  A communication module can be used to select the program from an external terminal.

**Program packages**

This allows you to specify the scope of the tumble dryer's program. You can select all of the programs or individual programs from the relevant program packages.

The tumble dryer's additional scope of programs can be configured. The programs are listed under “Program overview”.

**Favorite programs**

After switching on, you can also select a program via: ☆ Favorites.
12 programs can be stored as favorites based on your own priorities and requirements.

These favorite programs will also be made available in the control options
- **Laundromat ext. (12 prog)**
- **Laundromat, basic (4 prog)** (the first 4 of the 12 favorite programs).

You can specify the control option under Controls.

**Tip:** You can assign a different color to each program. In this case, the Program color allocation setting must be set to On.

**Changing Favorite programs**

- Select the program you wish to change or replace.
- Confirm the program or the setting to be changed.

Another menu opens, enabling you to select a new program or change the parameters.

- Confirm with the Save sensor control.

Your selection is now active.

**Special programs**

You can put together 5 special residual-moisture or time-controlled programs and assign your own program names.

First, enter the program name.

- Select the special program you want to change.

The Save as menu opens.

- Use the letters and symbols below the line to enter the name.
- Touch the Save sensor control.
You can now enter the parameters for a Res. moisture program or Timed drying.

The 5 special programs are pre-programmed at the factory. You can change these special programs.

<table>

Sort programs

Programs can be moved within the program list and in the Favorites list.

- Factory default: Off
- On
Supervisor level

Moving programs/favorites
You can move/change the order of the programs (program menu – single option list). You can also move and change the order of the favorites that you edit in the Supervisor level under Favorite programs.

- Touch the program that you wish to move.
- Press and hold the sensor control until the frame changes.
- Drag the program to the required place.

Program color allocation
You can assign a specific color to a favorite program. In the list of favorites, each favorite program is given a colored frame, which can be adjusted.

- Factory default: Off
- On

Process technology

Anti-crease
At the end of the program, the drum will continue to rotate at intervals if the laundry is not removed immediately.

Changing this setting leads to increased energy consumption.
The setting (🀏) can be switched off or a time between 1 and 12 hours can be selected.
Factory default: 2 hours

Drying levels
Changing this setting leads to increased energy consumption.

You can alter the drying levels for the Cottons, Minimum Iron, Automatic Plus, and Machine iron programs.

Drying levels Cottons, Minimum Iron, and Automatic Plus can be set to one of 7 different levels.
Factory default: Normal

Additional cooling
Before the end of the program, the temperature of the dried laundry is monitored and the cooling phase at the end of the program is extended if necessary.

Changing this setting leads to increased energy consumption.
- Factory default: Off
- On

Cooling down temperature
The laundry will be cooled down automatically before the end of the program. The automatic cooling-down phase which takes place before the end of a program can be set at a cooler level for all programs. This means that the cooling phase is extended.
Changing this setting leads to increased energy consumption.
The setting can be changed from 104-131°F (40°C–55°C).
Factory default: 131°F (55°C)

Service

Clean out the airways

The tumble dryer’s electronic calculates the degree at which lint or detergent residue in the lint filters and air ducts are impairing performance. A message to check the contamination appears. You can decide at what level of lint this reminder should be emitted.

This reminder, which you can configure, is displayed: Clean out the airways
- Off
  The reminder does not appear. However, if there is a very severe blockage in the ducting, the program will be canceled and the reminder will appear in the display regardless of this option.
- Heavy
  The reminder only appears when there is a heavy build-up of lint.
- Factory default: Normal
- Light
  The reminder appears when there is only a small build-up of lint.

Clean the filters

The lint filter in the air-supply area must be cleaned on a regular basis. You can set an hourly interval for the reminder.

The selected hourly interval depends on how much lint tends to build up and how often you wish to clean the filter, e.g., for hygiene purposes.

You can adjust this reminder: Clean the filters
- Time interval of 5 – 55 hours
- Factory default: after 55 hours
- Off

Service interval

The tumble dryer shows a custom message at a selected interval to prompt you to undertake specific maintenance tasks.

3 different messages can be created: 1/2/3. Each message is created in the language and alphabet of the current supervisor language.

Your message is displayed at the end of the program and can be acknowledged with OK.
The same message appears at the end of the next program.

Settings

This setting allows you to determine the interval (by hours or date) at which the message appears.
- Factory default: Off
Supervisor level

- By time
  You can then select a time interval from 1–9999 hours.
- By date
  You can enter a date.

Message text
Enter your message for your planned maintenance work. You can edit one, two, or all three of the 1/2/3 messages.

Resetting the display
The message appears until the display is permanently reset. The message then appears again once the next interval is reached.
External applications

External exhaust flap

External hardware is connected via the Miele XCI Box.

The time delay between the external exhaust-air flap’s activation point and the switch-on time for the drum/fan motor is regulated.

A message appears in the display while the exhaust-air flap is open.
- Factory default: Off
  This option must always be selected if there is no exhaust-air flap to activate. This prevents the program from being canceled.
- On
  - 0 seconds
  - 1 second
  - 2 seconds
  ...
  - 300 seconds

Additional fan

External hardware is connected via the Miele XCI Box.

If an extra fan is connected, it must be switched on at the same time as the drive unit.
- Off
- On

Pressure sensor

External hardware is connected via the Miele XCI Box.

When using a shared exhaust-air duct, one tumble dryer may have to be switched off or suppressed from the outset if certain pressure levels have built up in the ducting. Because the pressure sensor is an external unit, there is the option of reading in both a logical normally open contact or a normally closed contact.

A message appears in the display while the exhaust-air flap is open.
- Off = Not active
- NO contact = Active
  Responds to high potential
- NC contact = Active
  Responds to low potential

Peak load signal

External hardware is connected via the Miele XCI Box.
The peak-load negotiation function enables the tumble dryer to be connected to an energy-management system. When a signal is registered, the tumble dryer's heater is switched off for a short period or the appliance is prevented from being switched on. The tumble dryer may only be operated with a peak-load system if this system is connected to the tumble dryer via the Miele XCI Box.

- Factory default: No function
- Peak load with 230 V
- Peak load with 0 V

**Peak load prevention**

With this function, the application of a hygiene program is not amended when a peak-load signal is in place. The heater stays switched on.

- Factory default: Off
- On

**Select KOM module**

This tumble dryer is equipped with an integrated WiFi module. However, the tumble dryer can also be equipped with an external module.

- Off
- Internal module (factory default)
  - The internal WiFi module is used.
- External module
  - An XKM module or RS232 module is inserted into the module slot.

**Availability of Miele digital products**

The ability of Miele digital products depends on the availability of the services in your country.

The different services are not available in all countries.

For information about availability, please visit www.miele.com.

**WiFi / LAN**

Control the networking of your tumble dryer.

- Deactivate (visible when the network is activated)
  - The network remains set up; the WiFi function is switched off.
- Activate (visible when the network is deactivated)
  - The WiFi function is reactivated.
- Connection status (visible when the network is activated)
  - The following values are displayed:
    - The quality of WiFi reception
    - The network name
    - The IP address
- **Reset (visible when set up)**
  Resets the WiFi login (network) to immediately re-establish a new connection.

- **Reset (visible if already set up)**
  The network is no longer set up. A new connection has to be established in order to use the network again.
  - The WiFi is switched off
  - The WiFi connection will be reset to the factory default setting

**Remote**

Programs are selected on an external terminal.

Factory default: Off

**Remote Update**

The RemoteUpdate function is used for updating the software in your tumble dryer.

The RemoteUpdate function is deactivated as standard.

If you do not install a RemoteUpdate, you can continue to use your tumble dryer in the usual way. However, Miele recommends installing RemoteUpdates.

The RemoteUpdate menu option is only displayed and can only be selected if you have added your tumble dryer to your WiFi network.

Miele’s RemoteUpdate function can only be used if the tumble dryer is connected to a WiFi network and you have an account in the Miele Professional app. The tumble dryer must be registered in the app.

See the Miele Professional app for terms and conditions of use.

Some software updates can only be carried out by Miele Technical Service.

If a RemoteUpdate is available for your tumble dryer, it will be displayed automatically when the supervisor level is open.

You can choose to start the RemoteUpdate immediately or wait until later. If you select “Start later”, the prompt to run the RemoteUpdate will be displayed again the next time you switch on your tumble dryer.

The RemoteUpdate can take a few minutes.

Please note the following information about the RemoteUpdate function:

- You will only receive a message when a RemoteUpdate is available.
- Once a RemoteUpdate has been installed, it cannot be undone.
- Do not switch off the tumble dryer during a RemoteUpdate. Otherwise, the RemoteUpdate will be aborted and will not be installed.

Copyrights and licenses

For the purpose of operating and controlling the machine, Miele uses proprietary or third-party software that is not covered by open-source licensing terms. This software/these software components are protected by copyright. The copyright powers of Miele and third parties have to be respected.

Furthermore, this machine contains software components which are distributed under open-source license conditions. Please refer to the menu item Settings/Machine parameters/Legal Information/Open Source Licenses in the machine for the open-source components contained therein, together with the corresponding copyright notices, copies of the licensing conditions valid at the time, and any further information. The liability and warranty provisions of the open-source licensing conditions as stated therein apply only in relation to the respective rights holders.

Payment system

The XCI box accessory unit is required to connect a payment system.

Setting for payment systems

If you wish to change the settings after the commissioning process, please contact Miele Technical Service.

- No payment system
  The next settings are skipped and initial commissioning can be completed.

- Program control
  The machine is operated using a coin box. The user purchases a program.

- Timed operation
  The tumble dryer is coin-operated using a time meter. The user purchases a time-controlled program.

- Timed op. + impul. counter
  For payment systems where the usage time is increased each time a coin is inserted.

- KOM module
  The machine is operated by a central control unit.

ANY CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER’S AUTHORITY TO OPERATE THE EQUIPMENT.

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES AND CONTAINS LICENSE-EXEMPT TRANSMITTER(S)/RECEIVER(S) THAT COMPLY WITH INNOVATION, SCIENCE AND ECONOMIC DEVELOPMENT CANADA’S LICENCE-EXEMPT RSS STANDARD(S). OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

Contains FCC ID: 2ACUWEK037
Contains IC: 5669C-EK037

RADIATION EXPOSURE STATEMENT: THIS EQUIPMENT COMPLIES WITH FCC AND WITH ISED RADIATION EXPOSURE LIMITS SET FORTH FOR AN UNCONTROLLED ENVIRONMENT. THIS EQUIPMENT SHOULD BE INSTALLED AND OPERATED WITH A MINIMUM DISTANCE OF 20CM BETWEEN THE RADIATOR AND YOUR BODY. THIS DEVICE AND ITS ANTENNA(S) MUST NOT BE CO-LOCATED OR OPERATION IN CONJUNCTION WITH ANY OTHER ANTENNA OR TRANSMITTER.
Please have the model and serial number of your machine available when contacting Technical Service.
