Additives (e.g., detergent enhancers)

Make use of the maximum load of the washing machine. Use the detergent for the main wash, for example, as an additive. Check the folds of the fabric to see if there are any foreign objects. If applicable, remove the used capsules. For precise dispensing, use automatic detergent dispensing. Turn the program selector to the pre-wash program. Pour max. ¼ cup (60 ml) of chlorine bleach into the detergent dispenser drawer. Close the door. The welcome tone will sound and the welcome screen will light up. The values in the display can be changed with the sensor buttons. Different levels of soiling can be selected with the sensor buttons. If a sensor button is dimly lit, this means: the respective sensor button is illuminated for service technicians. The sensor buttons react to fingertip pressure. Operating the sensor buttons changes with the sensor buttons above or below the display. The display shows: 1. Program start 2. Program end 3. Program pause 4. Program delay 5. Program cancel 6. End of program. The symbol lights up brightly. The symbol lights up dimly. OK appears in the display. "TwinDos dispensing" is automatically activated. TwinDos dispensing is deactivated. TwinDos dispensing is activated. The remaining time of the wash program will appear in the display. The estimated energy and water consumption levels will be displayed as a consumption forecast for the selected wash program. You can use the Buzzer button to define a time period during which your washing machine should alert you. The buzzer will sound until the wash program is finished. You can change the suggested color setting of the wash program. Deactivating TwinDos dispensing You can remove the shipping struts after your Miele washing machine is unloaded by hand or with the help of a tumble dryer. Before using the machine for the first time, it should be washed without laundry to remove any remaining detergent or scale. There are three possible ways to select a program:

1. Deactivating or activating the automatic detergent dispenser
2. Via the Start/Stop sensor button and the display
3. Via the Extras sensor button and the display

There are two ways of selecting extras.

1. Selecting a washing program
2. Selecting program settings

For laundry with large amounts of dirt, you can select the pre-wash and bleach programs. The drum is filled with water and a pre-bleach wash takes place. The drum is then drained and bleaching takes place. After bleaching, the drum is refilled with water, drained, and bleached again. The drum is then drained and rinsed three times. The drum is then drained. The start of the wash program can be delayed from 15 minutes up to 23 hours. The buzzer will sound until the wash program is finished. You can use the Buzzer button to define a time period during which your washing machine should alert you. The buzzer will sound until the wash program is finished. With the SmartStart function you can define the time at which your washing machine will start. The SmartStart function is only possible if the wash program is set at least 15 minutes in advance.
