Turn the program selector to the desired position, confirm with the OK sensor button.

1. Preparing the laundry

Check the drum for pets or foreign objects before closing the door.

2. Selecting the standard programs with the program selector

For selecting programs and for switching on the washing machine, use the program selector.

3. Loading the washing machine

Loosely load the laundry in the drum.

4. Setting the washing parameters

The display will now guide you through the subsequent tumble dryer cycle.

5. Adding detergent

Chlorine (e.g., for whitening)

There are several options for adding detergent to the washing machine.

- Powder detergent in the detergent compartment:
  - Use only the correct amount. The take-up level of the detergent compartment is monitored by Miele@mobile. The program duration is then optimised automatically.

- Capsules:
  - Each capsule contains the correct amount of detergent. The wash duration is reduced.

6. Starting the program

If the program selector position and the Miele@mobile app currently selected, the program will start immediately.

7. Deactivating TwinDos dispensing

You can change the suggested color for the wash program to save energy in the subsequent tumble dryer cycle.

8. Setting program options

Selecting a temperature/spin speed

With the SmartStart function you can define a time period during which your washing machine will be in silent mode.

9. Adding extra options

You can supplement the wash programs with extra options.

- Options:
  - Eco
  - EcoPlus
  - Extra
  - SingleWash
  - Soak
  - Rinse plus
  - Pre-wash
  - Rinse

- Extra options:
  - No Detergent
  - Only Liquid Detergent
  - Only Soap Capsules
  - Only Powder Detergent
  - Deactivating the signal
  - Closing the door

Please note!

- The estimated energy and water consumption is based on the setting in the display.
- The interior drum lighting will come on.
- You can change the suggested color for the wash program to save energy in the subsequent tumble dryer cycle.
- The door will lock (will appear in the display signal).
- The door is still locked during the Anti-Vibration function.
**Program guide**
